# CONTENTS

## 6 | How Do the Popular Media Shape Views of Mental Health Issues?

Nobel laureate Eric Kandel, M.D., and film and television star Alan Alda will talk with Jeffrey Lieberman, M.D., about the influence of media on public perceptions of science and mental health.

## 7 | New York Without a Broadway Show Is Like a Bagel Without Lox

Several recent shows have opened to rave reviews, and new ones starring famous names are set to open this spring, so don't mull over your choices too long.

## 8 | Ellis Island Reveals an Indelible Chapter of America's Story

Ellis Island captures the backbone of this country's history: the migration of people from all corners of the world to create a new country and embark on a new life.

## 12 | Scientific Sessions, Networking Opportunities Target Residents

Complementing an extensive array of scientific sessions designed with trainees in mind will be a Resident Resource Center to facilitate networking and career development.

## 14 | Military Mental Health Issues Prominent on Annual Meeting Agenda

Dozens of sessions will delve into issues in treating veterans and active-duty military, including PTSD, suicide, comorbid physical and mental disorders, family concerns, and women's issues.

## 21 | Discover Why Dining in New York Is Often an Adventure and an Art

The Big Apple's astounding collection of restaurants from luxe to laid back provide an irresistible side dish to the annual meeting's meaty scientific sessions.

## 28 | Special Track to Describe Major Initiatives in NIMH's Research Pipeline

Sessions in multiple formats will provide psychiatrists with a detailed look at the National Institute of Mental Health's research projects and how they could alter psychiatric care.

## 30 | Explore Some Sites That Reveal the New York State of Mind

So you've seen the Empire State Building, Rockefeller Center, and Central Park. Here are a few off-the-beaten-track destinations that tourists often overlook.

## 41 | Psychiatrist/Pianist Will Explore Rachmaninoff's Music and Mind

Acclaimed psychiatrist and concert pianist Richard Kogan, M.D., will focus on Rachmaninoff and how a psychiatrist played a role in the famed composer's career.

### Register Now!

It's been a decade since APA took a bite of the Big Apple for its annual meeting. But once again members can sample the city that has in the past set annual meeting attendance records.

This issue of *Psychiatric News* contains the preliminary scientific program, information highlighting special sessions and events, and lots of interesting ideas for ways to spend your leisure time and enjoy the city that "doesn't sleep."

### FROM THE PRESIDENT

## APA 2014: Changing the Practice And Perception of Psychiatry

BY PHILIP MUSKIN, M.D., AND JEFFREY LIEBERMAN, M.D.

Annually, thousands of mental health professionals descend on a major American city to participate in a three-ring circus of pedagogic activities that comprise the annual meeting of the American Psychiatric Association. This event is an academic smorgasbord of all information relevant to psychiatric medicine and mental health care. It provides one-stop shopping for clinicians who wish to avail themselves of the latest scientific developments and all the education needed to practice their craft. The annual meeting is the highlight of the year for U.S. psychiatry.

APA's 167th Annual Meeting will take place May 3 to 7 in New York City and will be the epicenter for those who wish to learn of emerging knowledge and connect to leaders in the field of psychiatry. New York is a perfect place to host this year's meeting, given the extraordinary and historic events of the past year, including the launch of *DSM-5*, the release of the final rule for the Mental Health Parity and Addiction Equity Act, further implementation of the Affordable Care Act, and the emotionally wrenching discussion of mental illness and violence in the media.

The theme of the 2014 annual meeting is aptly titled "Changing the Practice and Perception of Psychiatry," reflecting the historic transformation in how our profession will be practiced, as well as perceived by our medical colleagues and the public at large. The Scientific Program Committee, chaired by Phil Muskin with Co-Chair Cam Carter, has produced an amazing program with a who's who of luminaries scheduled to speak. The Opening Session will feature a "Dialogue on Science and the Media" that I will moderate between Nobel Laureate Eric Kandel and the acclaimed actor Alan Alda. The Convocation Lec-

Philip Muskin, M.D., is chair of APA's Scientific Program Committee. He is also a professor of psychiatry at Columbia University Medical Center and chief of the consultation-liaison psychiatry service at New York-Presbyterian Hospital/Columbia University Medical Center. Jeffrey Lieberman, M.D., is the president of APA and professor and chair of psychiatry at Columbia University.

ture will be delivered by a major political figure who is leading major legislative initiatives in mental illness. Look for more information in a future issue.

Some of the featured and award lectures on the program include Eric Kandel (Nobel Laureate psychiatrist and neuroscientist), Karl Deisseroth (pioneering psychiatrist and neuroscientist), Nora Volkow (NIDA director), Tom Insel (NIMH director), Steve Hyman (former NIMH director and Harvard provost), Gary Gottlieb (CEO, Partners Health System), Andrew Solomon (award-winning author of the *New York Times* best-seller *Far From the Tree*, and E. Fuller Torrey (public mental health advocate, researcher, and author most recently of *American Psychosis: How the Federal Government Destroyed the Mental Illness Treatment System*), among others.

Another noteworthy lecturer is the former special advisor for health policy to the administration, Ezekiel J. Emanuel, M.D., Ph.D., who will impart his expertise on health care reform and the future of America's mental health.

There are also entertainers on the program, such as Joe Pantoliano from blockbusters like "Risky Business" and "The Matrix," but probably most famous for his role as Ralphie on "The Sopranos." Joe, an enthusiastic advocate for stopping mental illness stigma, will host a screening for his documentary "No Kidding, Me Too!" That is but one of several media workshops that include showings of powerful documentaries and films followed by thoughtful discussion.

The meeting has 450 sessions, 43 courses, and up to 50 CMEs to ensure you are on top of the latest medical advances and discoveries, new therapies, and ever-evolving technologies and to enable you to achieve your professional goals at every career stage.

Cam Carter will chair a particularly interesting symposium on cognitive neuroscience and psychodynamic therapy. Your clinical skills can be enhanced by attending master courses, including one on learning how to utilize *DSM-5*.

To help you navigate the annual meeting and customize your schedule, see **From the President** on facing page

#### REGISTER NOW FOR MEETING AND SAVE ON FEES!

See insert at page 13 for registration information. Advance registration fees are now in effect, and you can save even more by registering online.

many sessions are organized into specialized tracks for planning each day including Addiction, Child and Adolescent, Ethics, Forensic Psychiatry, Geriatric, Integrated Care, and Psychosomatic Medicine. To support residents, there is a mentoring track focused on timely issues like launching your practice in today's digital world of online identities.

And, as President Obama stressed in his recent State of the Union speech, the mental health of veterans and military families is a national priority, and this year's program includes a track dedicated to military health care including several sessions on new tools for PTSD.

The Integrated Care Track features interactive sessions applicable to every psy-

chiatric physician in this current culture of health care reform and comprehensive patient-centered service. By participating in workshops led by experts like Lori Raney, M.D., you will learn practical skills to prepare for leadership roles of the psychiatrist within a collaborative care team. The CPT coding workshop, chaired by Ronald Burd, M.D., is another educational

opportunity relevant to all due to changes in health care financing and reimbursement that occurred at the start of 2014.

Especially timely this year, the Forensics Psychiatry Track provides an in-depth dialogue on mental illness, mass shootings, and risk management of violent and suicidal patients. Also on the agenda, J. Richard Ciccone, M.D., who will receive the Issac Ray Award, will present "Daniel McNaughton and the Evolution of the Insanity Defense."

This year's program offers sessions and workshops focused on telepsychiatry advances, best practices for EHRs, and managing our personal digital reality, staying apt and effective via online identities. One course in the track tailored to residents is "Sex, Drugs, and Social Media: Professionalism and Ethics Put to the Test," led by Glen O. Gabbard, M.D.

The premiere of the International Pavilion in the Member Center is another highlight of the 2014 meeting.

If you want to find out the latest annual meeting highlights, please take advantage of APA's social media and follow @APAPsychiatric on Twitter and #APAAM14. You will find us on Twitter @MDPrm1 and @DrJlieberman. Hopefully you will join the conversation and engage in live tweeting during the meeting using #APAAM14. The free annual meeting app will be available soon with more features than ever, so please download and share with other attendees. We look forward to a great meeting and hope to see you all there! # Kandel, Alda to Discuss Media And Science With APA President

A session following the opening of APA's 2014 annual meeting will bring together an engaging triad who share a burning interest in science.

BY MARK MORAN

Three stars of science, psychiatry, and entertainment will meet for a special "Dialogue on Science, Psychiatry, and the Media" immediately following the Opening Session at APA's 2014 annual meeting in New York City.

Nobel Prize-winning researcher Eric Kandel, M.D., and actor Alan Alda will join APA President Jeffrey Lieberman, M.D., to talk about the impact of science

and the media on psychiatry and how they will influence the future of mental health care.

The Opening Session and dialogue will take place on Sunday, May 4, from 4:30 p.m. to 6:45 p.m. in Hall E, Level 3, of the Javits Convention Center.

Kandel is the only American psychiatrist to have received the Nobel Prize, which he did in 2000 for his discoveries concerning the cell and molecular mechanisms of learning and memory. He has been a frequent lecturer at APA annual meetings on such topics as how to simulate symptoms of mental illness in laboratory animals for the purposes of research and how neuroscience may inform the insights of psychoanalysis.

At this year's annual meeting, in addition to the Opening Session dia-

logue, Kandel will be delivering the APA Distinguished Psychiatrist Lecture titled "New Findings in PTSD." He is the University Professor and Kavli Professor of Brain Science in the departments of Neuroscience, Biochemistry, and Psychiatry at Columbia University; director of the Kavli Institute for Brain Science;

APA President Jeffrey Lieberman, M.D., is chair of psychiatry at Columbia University.

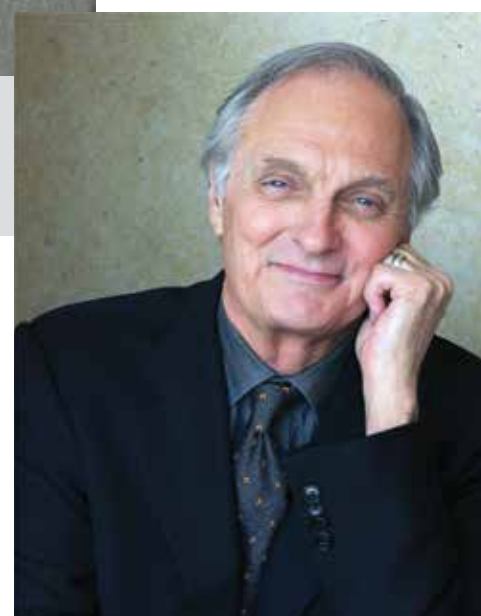

Erick Kandel, M.D., received the Nobel Prize in 2000 for discoveries concerning signal transduction in the nervous system.

co-director of the Mortimer B. Zuckerman Mind Brain Behavior Institute; and senior investigator at the Howard Hughes Medical Institute.

Alda is a seven-time Emmy Award winner who played Hawkeye Pierce on the classic television series "M\*A\*S\*H" and appeared in continuing roles on "ER," "The West Wing," and "30 Rock." He has 33 Emmy nominations as an actor, writer, and director and is a Television Hall of Fame inductee. He has starred in, as well as written and directed, many films and was nominated for an Academy Award for his role in "The Aviator."

Science and the stories of scientific discovery have long fascinated the actor. He hosted the award-winning PBS series "Scientific American Frontiers" for 11 years for which he interviewed hundreds of scientists from around the world. In 2010 he hosted a science series called "The Human Spark" and in 2013 hosted "Brains on Trial," both on PBS.

Film and television star Alan Alda hosted the award-winning PBS series "Scientific American Frontiers" for 11 years.

almost a million people since its inception.

He is a visiting professor at the Alan Alda Center for Communicating Science at Stony Brook University, where he helps develop innovative programs that enable scientists to communicate more effectively with the public. Alda is also the author of the play "Radiance—the Passion of Marie Curie," which had its world premiere at the Geffen Playhouse in Los Angeles in November 2011. **PN**

## Annual Meeting Highlights

Here are just some of the annual meeting highlights and general information that will help you get the most out of your experience at the meeting.

- **Opening Session:** Sunday, May 4, 4:30 p.m.-6:45 p.m. Opening ceremonies will be followed by a dialogue between APA President Jeffrey Lieberman, M.D., Nobel Prize-Winning psychiatrist Eric Kandel, M.D., and award-winning actor and science communicator Alan Alda, on the impact of science and the media on psychiatry and how they will influence the future of mental health. Hall 3E, Javits Convention Center.
- **Convocation of Distinguished Fellows:** Monday, May 5, 5:30 p.m.-6:30 p.m. The session includes the induction of distinguished fellows and introduction of 50-year distinguished life fellows, life fellows, and life members; international distinguished fellows, life fellows, and fellows; presentation of awards; and the presentation of the William C. Menninger Memorial Convocation Lecture. Hall 3E, Javits Convention Center.
- **Registration/Course Enrollment:** Friday, May 2, noon-7 p.m.; Saturday-Tuesday, May 3-6, 7:30 a.m.-5 p.m.; and Wednesday, May 7, 7:30 a.m.-10:30 a.m. Halls 3A/B, Javits Convention Center.
- **Course Enrollment and Registration:** Friday, May 2, 3 p.m.-7 p.m.; Saturday-Tuesday, May 3-6, 7:30 a.m.-5 p.m. Promenade, Second Floor, New York Hilton Midtown Hotel.
- **Courses/Master Courses:** All courses/master courses/seminars will be held at the New York Hilton Midtown Hotel. Course hours are Saturday-Tuesday, May 3-6, 8 a.m.-noon, 9 a.m.-4 p.m., 1 p.m.-5 p.m. *Exceptions:* there will be no afternoon courses on Sunday, and the buprenorphine course will be held Tuesday, May 6, 8 a.m.-5 p.m.
- **New Research Posters:** Resident Competition Poster Sessions: Saturday, May 3, 10 a.m.-11:30 a.m. and 12:30 p.m.-2 p.m.; International Poster Session: Saturday, May 3, 2:30 p.m.-4 p.m. For other poster sessions, check the program guide. Hall 3A/B, Javits Convention Center.
- **Media Workshops:** Along with sessions scheduled during the day, there will be one evening session each day, Saturday-Tuesday, May 3-6, 7 p.m.-10 p.m. Astor Ballroom, New York Marriott Marquis.
- **APA Member Center and APP Bookstore:** Saturday, May 3, 9 a.m.-4 p.m.; Sunday-Tuesday, May 4-6, 10 a.m.-4 p.m. Halls 3A/B, Javits Convention Center.
- **Publishers' Book Fair, International Meeting Booths, and Career Fair:** Saturday, May 3, 9 a.m.-4 p.m.; Sunday-Tuesday, May 4-6, 10 a.m.-4 p.m. Halls 3A/B, Javits Convention Center.
- **Exhibits:** Sunday-Tuesday, May 4-6, 10 a.m.-4 p.m. Halls 3A/B, Javits Convention Center.
- **American Psychiatric Foundation Benefit:** Saturday, May 3, 7 p.m.-10 p.m. Intrepid Sea, Air, and Space Museum Complex (see page 8).
- **MindGames:** Tuesday, May 6, 6 p.m.-7 p.m., hosted by Glen Gabbard, M.D. Broadway North/South, New York Marriott Marquis.
- **Shuttle Busing:** Saturday-Wednesday, May 3-7. Starts each day at 7 a.m. with pick up at hotels; last departure from Javits Convention Center: Saturday-Monday, May 3-5, 7:30 p.m.; Tuesday-Wednesday, May 6-7, 5:30 p.m.

Andrey Bayda/Shutterstock

## Drama! Laughs! Music! They Can All Be Yours!

While cutting-edge science will be on the bill at the Javits Center, cutting-edge theater will be a strong lure just a few blocks to the north.

BY KEN HAUSMAN

If you asked people to free associate with the name New York, it's a safe bet that "Broadway" would be the first response on many lists. And psychiatrists attending the annual meeting this May will have an embarrassment of theater riches from which to choose when they want that Broadway experience.

First, a brief geographical note—there are only a few Broadway theaters that are actually on the Great White Way. Theaters referred to as Broadway theaters are actually scattered across more than a dozen blocks of Midtown Manhattan from Sixth Avenue to Ninth Avenue and from Times Square on the South to the mid-50s on the North.

Now on with the shows.

Last year's Tony Award winner for Best Musical is still kicking up its Technicolor heels at the Al Hershfeld Theater. "Kinky Boots," with its award-winning score by Cyndi Lauper and a book by Harvey Fierstein, a four-time Tony winner, is the story of the improbable partnership between a London drag queen, Lola, and Charlie, a young man who inherits a failing shoe factory upon his father's death. The hilarious yet poignant show depicts Lola's efforts to convince Charlie that he can save the doomed

Sylvain Gabouy/PatrickMcMullan.com/AP Images

Stark Sands (left) and Billy Porter lead the cast of drag queens and shoe-factory workers in the finale of "Kinky Boots," which won last year's Tony Award for Best Musical.

shoe factory if he takes it in a new and daring direction—manufacturing outrageous and often kinky footwear that he promises his fellow drag queens will line up to buy. The business partnership turns into an unexpectedly strong friendship with each inspiring the other with confidence and a safe place to be themselves. The choreography is spectacular, and Lauper's songs ricochet from moving ballads to pull-out-the-stops production numbers.

Another can't-miss show goes back in time a millennium or so to trace the exploits of Char-

lemagne's wayward son, Pippin, who like any teen is bored with his life and vows to find adventure and passion and to make history take notice. Pippin's story is told by a troupe of actors, and the

eye-popping, high-energy revival of the 1970s production has added some spectacular Cirque de Soleil-like elements with acrobatics, trapeze swinging, sword fighting and throwing, and even creative hula hooping. It also involves truly diverse themes such as patricide, magical powers, and the search for a soul mate. "Pippin" has also added two indelible songs to the Broadway canon, "Magic to Do" and "Corner of the Sky." It won last year's Tony for best revival of a musical and one for Patina Miller as best actress in a musical. It's playing at the Music Box Theater.

A new musical that will have special appeal for baby boomers is "Beautiful—The Carole King Musical." If you are a fan of the songwriter and singer, this musical biography of the artist whose career has spanned more than 50 years and counting is probably going to be high on your list of Broadway evenings. It is at the Stephen Sondheim Theater.

Another new musical with a familiar story line is "The Bridges of Madison County," based on the book by Robert James Waller. Its previous incarnation was a hit film starring Meryl Streep and Clint Eastwood. It is the story of the love affair between a lonely married woman living in rural Iowa in the 1960s and the National Geographic photographer who meets her while on assignment in Madison County. The book for the show was written by Marsha Norman, who won a Pulitzer Prize for Drama for her play "Night, Mother." It is at the Gerald Schoenfeld Theater.

And several of the musicals with far more than nine lives are still playing to sell-out audiences, so don't overlook those if they haven't played in your town or you were too busy to see them. And for the first three, try to order tickets right away and hope for the best! Among these are "The Book of Mormon," "Wicked," "The Lion King," "Jersey Boys," "Chicago," and, yes, the chandelier is still crashing down on "The Phantom of the Opera"—now in its 25th year on Broadway. **PN**

### How to Get Tickets

Theater tickets can be purchased through several websites. To find them, search on "New York theater tickets." For shows that aren't sold out, discount same-day tickets are available at the TKTS booth in Times Square at Broadway and 47th Street. The best selection is usually for weekday tickets. There is also a TKTS branch in the South Street Seaport in lower Manhattan. Discounts run from 25 percent to 50 percent, plus service charge. For hit shows, it's best to buy tickets as far ahead as possible because they are unlikely to appear at TKTS.

Underwood &amp; Underwood/Corbis

Immigrants were questioned by inspectors in the Registry Room (or Great Hall) in the main Ellis Island building.

## Visitors to Ellis Island Museum Can Discover Their Own Past

The Ellis Island Immigrant Museum not only documents the arrival experience of immigrants in the late 19th and 20th centuries; it also houses the passenger records of ships that landed millions of people there.

BY MARK MORAN

**O**f all the historic sites in the United States, there is none with which so many living Americans may have a personal connection than Ellis Island.

It has been estimated that nearly half of all Americans today can trace their family history to at least one person who passed through the Port of New York at Ellis Island when it was the nation's busiest immigrant inspection and detention station from 1892 until 1954.

Today, the Ellis Island Immigration Museum, located in the main building of the former immigration station complex and devoted to telling the story of the 12 million immigrants who entered America through its doors, is one of New York's most popular attractions.

Visitors can take a 45-minute audio tour, available in nine languages, which invites them to relive the immigrant experience as if they were the

Cathy Brown

"new arrival." Additional tour options describe exhibits in more detail via in-depth interviews with historians, architects, and archaeologists. A special children's tour is narrated by "Marty the Muskrat" and is offered in five languages.

Below is a summary of some of the features of the museum.

- **The American Family Immigration History Center:** This interactive area is where you may find records of your family's beginnings in the new world.

ancestor's journey. At the Statute of Liberty–Ellis Island Foundation website, individuals can search records and ship manifests for ancestors who may have passed through Ellis Island. Helpful information is also available about how to do genealogical research. To get started, go to [http://www.ellisland.org/Eiinfo/Press\\_AFIHC.asp](http://www.ellisland.org/Eiinfo/Press_AFIHC.asp).

- **Journeys: The Peopling of America Center, 1550-1890.** This exhibit, now open in the historic Railroad Ticket Office, tells the story of immigration to the Americas before the Ellis Island era. Visitors move sequentially through the galleries devoted to separate themes: "Leaving," "Making the Trip," "Arrival," "Struggle and Survival," and "Building a Nation." The exhibit examines persistent issues related to immigration such as tensions between newcomers and established residents.

- **The American Flag of Faces:** This animated red, white, and blue flag is located in the museum's main entrance hall and is filled with a montage of images submitted by individuals of their families, their ancestors, or themselves. Visitors can search by name to call up a photo, which will then dynamically appear in the center of the flag. To submit family photos, go to the American Flag of Faces

Vlad G/Shutterstock

Above is the main building on Ellis Island, as seen approaching the ferry slip. The Ellis Island Immigration Museum has received more than 20 million visitors since it opened in 1990.

Visitors who wish to make use of the center for research purposes are advised to gather as much information ahead of time as possible, including each passenger's first and last names; approximate year of arrival; "ethnicity—which may include race, nationality, and religion—approximate age on arrival; ship of travel; port of departure; and whether the passenger traveled with other family members. Experienced volunteers can provide guidance so visitors can view manifests and ship images from their

at [https://www.ellisland.org/Eiinfo/American\\_Flag\\_launch.asp](https://www.ellisland.org/Eiinfo/American_Flag_launch.asp). **PN**

**APA** members are reminded that Ellis Island is one of the most heavily visited monuments in the country, and careful planning of your visit is encouraged. Statue Cruises provides ferry transportation to Ellis Island from Battery Park in New York and Liberty State Park in New Jersey from 9 a.m. to 5 p.m. daily. For ticket rates and availability and schedule information, call (877) LADY TIX or visit [www.statuecruises.com](http://www.statuecruises.com).

# Tenement Museum Brings America's Immigrant Story to Life

**Restored multifamily dwellings depict life in the tenements when it is believed New York's Lower East Side was the most densely populated location in the world.**

BY MARK MORAN

**T**he immigrant experience was and still is an important part of the American experience.

And the flood of immigrants who settled in New York's Lower East Side in the 19th and early 20th centuries was the source of brains, manpower, and ambition that helped to transform America into a global superpower. The tenement buildings of Manhattan where they first settled—cramped, often unsafe, multiple-family dwellings—were the first American homes of immigrants often struggling to learn a new lan-

This is a replication of the kitchen of the Levine family, who lived at 97 Orchard Street in the 1890s.

guage and customs while trying to make a new life and raise a family with limited means.

The Tenement Museum preserves

and interprets the history of immigration as it was experienced in one seemingly ordinary building at 97 Orchard Street. Erected on Manhattan's Lower

East Side in 1863, this tenement apartment building housed a total of nearly 7,000 working-class immigrants before it was vacated in 1941.

The original building contained 20 three-room apartments, arranged four to a floor, two in front and two in the rear. Each totaled only 325 square feet and consisted of a front room—the only room that received direct light and ventilation—bedroom, and kitchen. Cutting through the center of the building was an unlighted, ventilated wooden staircase.

There are three ways visitors to New York can experience the Tenement Museum—by touring the building at scheduled walking tour times; meeting the residents (played by costumed interpreters) who lived at 97 Orchard Street; and walking the neighborhood and discovering the Lower East Side and the way immigrants helped shape the area and its culture.

The building tours are centered around five main themes: “Shop Life,” on the ground floor of the museum, explores the family-run stores that filled the lower level of 97 Orchard; “Irish Outsiders,” on the fourth floor, allows visitors to experience the immigrant saga through the music of Irish America, then tour the restored apartment of the Moore family, Irish-Catholic immigrants; “Sweatshop Workers,” on the third floor, replicates the Levine family garment workshop and the Rogarshevskys’ Sabbath table at the turn of the 20th century; “Hard Times,” on the second floor, shows how immigrants survived economic depressions at 97 Orchard Street between 1863 and 1935; and “Exploring 97 Orchard,” on multiple floors and offered only on Thursdays, which allows visitors to go behind the scenes at the Tenement Museum and explore the layers of history in the tenement’s physical fabric.

Two of the tours—“Hard Times” and “Sweatshop Workers”—also have extended three-hour versions that include a discussion following the tour.

The Tenement Museum is the brainchild of Ruth Abram, an historian and social activist, who wanted to build a museum to honor America’s immigrants. In the late 1980s she and fellow-founder Anita Jacobsen stumbled upon the 97 Orchard building, in which they found the remnants of dilapidated apartment dwellings from the early 20th century, including sheet-metal ceilings, an old wooden staircase bannister, and turn-of-the-century toilets. “It was as though people had just picked up and left,” Jacobson is quoted as saying on the museum’s website. “It was a little time capsule. . . . I called Ruth and said ‘We

## Come Aboard for Evening Gala To Support MH Education, Services

**Enjoy an evening on the water as you benefit educational and service programs supported by the American Psychiatric Foundation.**

BY LINDSEY MCCLENATHAN

**S**pend an evening of good conversation, good food, and live music with your colleagues at the American Psychiatric Foundation’s annual benefit in one of New York’s most unusual spaces—Hangar 2 of the Intrepid aircraft carrier, part of the Intrepid Sea, Air, and Space Museum. Visitors will be able to explore Hangar 2 and peruse its many exhibits.

The benefit will be held on Saturday, May 3, from 7 p.m. to 10 p.m. The evening’s events include honoring recipients of the 2014 Awards for Advancing Minority Mental Health.

The USS Intrepid was launched in

1943 and served through World War II (surviving five kamikaze attacks and one torpedo strike) and the Vietnam War before being used as a NASA recovery vessel for the Gemini and Mercury space missions in the 1960s. The ship was decommissioned in 1974. During its active-duty years, more than 50,000 men served on the aircraft carrier.

The USS Intrepid is now berthed on the Hudson River, serving as the centerpiece for the Intrepid Sea, Air, and Space

Museum. The museum, founded in 1982, allows visitors to experience a piece of American history and is a showcase for sea, air, and space innovation—and the stories of human triumph that they represent. The USS Intrepid is a National Historic Landmark.

The American Psychiatric Foundation is the charitable subsidiary of APA and holds a benefit each year in conjunction with APA’s annual meeting to support its public education and research initiatives. **PN**

**▶** To obtain more information or purchase tickets for the benefit, visit the American Psychiatric Foundation’s website at [www.psych-foundation.org](http://www.psych-foundation.org). Tickets are \$150.

Lindsey McClenathan is the American Psychiatric Foundation marketing and development manager.

## Give a Slice of Yourself To the Big Apple

Now in its fifth year, APA Gives Back is an opportunity for APA members and annual meeting attendees to support a community organization in the city where the annual meeting is held. Support this year's program with a donation to the Doe Fund. APA will match your donation dollar for dollar.

The Doe Fund develops and implements cost-effective, holistic programs that meet the needs of a diverse population working to break the cycles of homelessness, addiction, and criminal recidivism. All of the Doe Fund's programs and innovative business ventures strive to help homeless and formerly incarcerated individuals achieve permanent self-sufficiency.

Since its inception in 2010, the APA Gives Back program has donated about \$42,052 to local groups in cities hosting the annual meeting.

For more information about the Doe Fund, go to <http://www.doe.org/index.cfm>. Contributions may be made through APA's registration system for the annual meeting at <http://annualmeeting.psychiatry.org/registration>.

## RESIDENTS' FORUM

## Residents Will Find Resource Center Their Home Away From Home

BY ERIK VANDERLIP, M.D.

The 2014 APA annual meeting this May will play host to an unprecedented number of activities and opportunities for trainees in attendance like me and you. APA staff and resident representatives have worked hand in hand with national leaders in psychiatry to create a meeting truly centered on us—APA's freshest demographic.

The central hub of the meeting for trainees is the Resident Resource Center, which will be located in the Javits Convention Center in the 3D glass room on

Erik Vanderlip, M.D., is a second-year fellow in psychiatry health services research at the University of Washington and the resident-fellow member trustee on the APA Board of Trustees.

the 3rd floor, open daily from 7:30 a.m. to 5 p.m. (just follow the signs!). The center will be staffed by local psychiatry residents and resident leaders within APA who will be ready to point you to the resources you need to make the most of your time at the annual meeting.

Created to facilitate networking and career development, the Resident Resource Center will host daily brown-bag mentorship lunches with national leaders in major subspecialties from noon to 1 p.m. and sessions on how to spiff up that CV of yours.

On Monday and Tuesday the center will play host to the Resident-Fellow Caucus meetings at 3 p.m.—a chance to

learn more about leadership opportunities within APA, current issues affecting all of us, and opportunities to meet one on one with APA leaders so you can share your vision for the future of our profession.

Drop by the center to get information on the Meet the Experts Sunny-Side Up breakfast and the Women's Mentoring Breakfast, both scheduled for Monday at the New York Hilton Midtown (see box at right). For those interested in boosting their academic careers, the Early Research Career Breakfast (RSVP required) will be held Tuesday, also at the Hilton.

And don't miss the chance to test your mental mettle against the teams participating in the MindGames finals on Tuesday at 6 p.m. at the Marriott. In this "Jeopardy"-like competition, three

see **Residents** on facing page

## Mentoring for Residents

These are among the mentoring opportunities available at APA's 2014 annual meeting.

**MONDAY, MAY 5**

7 a.m.-8:30 a.m.

**Meet the Experts Sunny-Side Up Breakfast**

*Mercury Ballroom, Third Floor, New York Hilton Midtown*

7:30 a.m.-9:30 a.m.

**Women's Mentoring Breakfast**

*Nassau East Room, Second Floor, New York Hilton Midtown*

**TUESDAY, MAY 6**

7 a.m.-8:30 a.m.

**Early Research Career Breakfast** (RSVP to Ernesto Guerra at [eguerra@psych.org](mailto:eguerra@psych.org))  
*Mercury Ballroom, Third Floor, New York Hilton Midtown*

## Scientific Sessions and Events for Residents

APA has planned a full schedule of events for residents so they can meet and socialize with one another, ask questions, share information, and learn more about their chosen profession. The registration fee for the annual meeting includes admission (on a first-come, first-served basis) to all scientific sessions (for example, symposia, workshops, lectures, and forums), except courses, and other events like product theaters. Here is a sample of events for residents. The complete Resident Track is posted at <http://annualmeeting.psychiatry.org/residents>.

**SATURDAY, MAY 3**

9 a.m.-4 p.m.

**Master Course: Psychiatry Review** (additional fee required)

*Grand Ballroom West, Third Floor, New York Hilton Midtown*

10 a.m.-11:30 a.m.

**Resident and Student Poster Competition I**

*Halls 3A/3B, Level 3, Javits Convention Center*

Noon-1:30 p.m.

**Resident and Student Poster Competition II**

*Halls 3A/3B, Level 3, Javits Convention Center*

11 a.m.-12:30 p.m.

**Media Training 101 for Residents and Early Career Psychiatrists: A Hands-On, Interactive Experience** (American Psychiatric Leadership Fellowship)

*Rooms 1D05/06, Level 1, Javits Convention Center*

1:30 p.m.-3 p.m.

**The American Journal of Psychiatry Residents' Journal: How to Participate**

*Rooms 1D03/04, Level 1, Jacob K. Javits Convention Center*

1:30 p.m.-3 p.m.

**ABPN Update: Certification in Psychiatry and Its Subspecialties**

*Room 1E16, Level 1, Javits Convention Center*

**SUNDAY, MAY 4**

8 a.m.-9:30 a.m.

**At the Cusp of the Future: Resident-Fellow Member and Early Career Psychiatrist Perspectives on the Transformations in Psychiatry**

*Rooms 1D05/06, Level 1, Javits Convention Center*

10 a.m.-11:30 a.m.

**Blurred Lines: Challenges Encountered by Psychiatry Trainees in Maintaining Professionalism in the Digital Age**

*Rooms 1D05/06, Level 1, Javits Convention Center*

12:30 p.m.-2 p.m.

**Workshop: Making the Most of Your Chief Year: Chief Residents' Forum I** (for residents only)

*Shubert/Uris/Plymouth, Sixth Floor, New York Marriott Marquis*

12:30 p.m.-2 p.m.

**Mind/Body Practices for Trainees: Reducing Stress, Enhancing Empathy, and Treating Patients Integratively**

*Room 1E16, Level 1, Javits Convention Center*

2:30 p.m.-4 p.m.

**Workshop: Making the Most of Your Chief Year: Chief Residents' Forum II** (for residents only)

*Shubert/Uris/Plymouth, Sixth Floor, New York Marriott Marquis*

**MONDAY, MAY 5**

7 a.m.-8:30 a.m.

**Mentoring Event: Meet the Experts Sunny Side-up Breakfast**

*Third Floor, Mercury Ballroom, New York Hilton Midtown*

8 a.m.-Noon

**Seminar: Research Literacy in Psychiatry: How to Critically Appraise the Scientific Literature**

*Gibson Suite, Second Floor, New York Hilton Midtown*

8:30 a.m.-5 p.m.

**Chief Resident Executive Leadership Program** (requires separate registration; contact [education@psych.org](mailto:education@psych.org))

*New York Hilton Midtown*

1:30 p.m.-2 p.m.

**Workshop: Professionalism in the Era of 2.0: The Dos and Don'ts of Blogging, Texting, Posting, Emailing, and Tweeting**

*Room 1A19/1A20, Level 1, Javits Convention Center*

**TUESDAY, MAY 6**

1:30 p.m.-3 p.m.

**Workshop: A Resident's Guide to Borderline Personality Disorder: From the Experts (Part I of II)**

*Shubert/Uris/Plymouth, Sixth Floor, New York Marriott Marquis*

3:30 p.m.-5 p.m.

**Workshop: A Resident's Guide to Borderline Personality Disorder: From the Experts (Part II of II)**

*Shubert/Uris/Plymouth, Sixth Floor, New York Marriott Marquis*

3:30 p.m.-5 p.m.

**Early Career Psychiatry 101: Pearls, Pitfalls, and Strategies for Negotiating Your First Job and Other Transitions After Residency**

*Marquis Ballroom B/C, Ninth Floor, New York Marriott Marquis*

6 p.m.-7 p.m.

**MindGames Resident Competition** (hosted by Glen Gabbard, M.D.)

*Broadway North Center, Sixth Floor, New York Marriott Marquis*

**The American Journal of Psychiatry Residents' Journal: How to Participate**  
Chairs: Robert Freedman, M.D., Arshya B. Vahabzadeh, M.D.

**Food Insecurity Among Individuals With Serious Mental Illnesses: Screening for and Addressing an Underrecognized Problem in Your Practice** Chair: Michael T. Compton, M.D., M.P.H.

**Self-Care Meditation Approaches Used Adjunctively in PTSD Management** Chairs: Matthew Fritts, M.P.H., Marina A. Khusid, M.D.

**Isaac Bonsall and the Quaker Connection in Early American Psychiatry** APA Ethics Committee and Penn-Scattergood Ethics Program; Chair: David Roby, M.D.

**Psychoactive Medication Usage in Active-Duty Service Members** Chair: Patcho N. Santiago, M.D., M.P.H.

**Violence and the American Soldier** Chairs: Marvin Oleshansky, M.D., Elspeth C. Ritchie, M.D., M.P.H.

**Learning to Improve: Creating a Model for Teaching Systems-Based Practice and Improvement Skills Within a Psychiatric Health Care Setting** Chair: Sunil Khushalani, M.D.

## 2 P.M.-5 P.M. ADVANCES IN MEDICINE

**Medical Mysteries and Practical Med Psych Updates: Is It "Medical," "Psychiatric," or a Little of Both?** Chair: Robert M. McCarron, D.O.

## ADVANCES IN SERIES

**DSM-5: Cases That Clarify the New Nomenclature** Chair: John W. Barnhill, M.D.

## Residents' Forum

*continued from facing page*

teams of residents face off to display their knowledge on topics in medicine in general, psychiatry in particular, and patient-care issues. It's always great fun!

Also at the meeting, you can upgrade your expertise in any number of areas by flagging the Resident-Fellow track on your APA app, and you'll want to reserve an extra-special high-five for your colleagues presenting at the Resident poster competition on Saturday.

For those looking to stay as current as possible on highlights during the meeting, you should check out the Annual Meeting Facebook Group (search "APA 2014 Annual Meeting—Resident Edition" to join). For trainees in at the meeting seeking to discover all the Big Apple has to offer, a series of nightly outings will be publicized for socializing and

## MEDIA WORKSHOP

**"How to Survive a Plague": A Story of the Early AIDS Epidemic, the Development of Antiretroviral Drugs, and the Impact This Had on Our Patients** Chair: Philip Bialer, M.D.

## PRESIDENTIAL SYMPOSIA

**Changing the Practice of Psychiatry: European Versus U.S. Perspectives** Chair: Mario Maj, M.D., Ph.D.

1. European Perspectives About Ongoing and Expected Developments in Psychiatric Diagnosis Josef Parnas, M.D., Ph.D.

2. U.S. Perspectives on Psychiatric Diagnosis: Past and Future S. Nassir Ghaemi, M.D., M.P.H.

3. Psychotherapy in Europe and the Economy: A Priority for Early and Effective Intervention in Youth? David Fowler, M.B.B.S.

4. U.S. Perspectives on the Practice of Psychotherapy: Present and Future Michael E. Thase, M.D.

## Women Psychiatrists: A Place to Gather, Share, and Learn

You are invited to join with other women psychiatrists at the APA Women's Center at APA's 2014 annual meeting to connect with friends and colleagues, dialogue about women's issues of importance to you, and exchange career advice, practice tips, and hard-earned pearls of wisdom. Refreshments will be available.

### Schedule and Locations:

Sunday, May 4: 3 p.m.-6 p.m., Rooms 2D06/07, Javits Convention Center

Monday, May 5: 9:30 a.m.-11:30 a.m., Madison Suite, Second Floor, New York Hilton Midtown

Tuesday, May 6: 11:45 a.m.-3 p.m., Rooms 2D06/07, Javits Convention Center

Also, there will be a lactation room in Room 2D16 in the Javits Convention Center. The key to the room may be picked up in the Meetings Office in Room 1E03.

Look for Women's Center programming information in future issues or contact Alison Bondurant at (703) 907-8639 or [Diversityatapa@psych.org](mailto:Diversityatapa@psych.org).

## Military Mental Health Issues Will Be in Meeting Spotlight

**There will be dozens of opportunities to learn more about providing mental health care for those who have served in the armed forces, including a special focus on women at war.**

BY AARON LEVIN

**W**ars in Afghanistan and Iraq over the last dozen years have brought home to the American psychiatric community the scope and complexity of the mental health needs of combatants and veterans.

Attendees at this year's annual meeting will have their choice of 45 sessions at which they can learn more about psychiatric care for military populations.

"This is our fourth year, and it will be better than ever," said Military Track coordinator Elspeth Cameron Ritchie, M.D., M.P.H., chief medical officer of the District of Columbia Department

of Behavioral Health and a retired U.S. Army psychiatrist.

Sessions in the scientific program's Military Track are scheduled every day of the annual meeting.

One panel ("Walter Reed From 9/11 to Today") will take the long view, examining how clinicians at Walter Reed National Military Medical Center responded over a dozen years to the mental health needs of service members. Their role grew as military health care moved beyond its focus on battlefield physical injuries to include traumatic brain injury, posttraumatic stress disorder (PTSD), and suicide. Speakers will address the decade-long process of preventing and caring for psychiatric conditions through the deployment cycle, lessening stigma, and addressing the needs of troops with comorbid physical and psychological injuries. Another speaker will examine the role that the September 11 attack on the Pentagon played in increasing the awareness of senior military leaders about mental health issues among their troops.

Another notable aspect of the recent conflicts has been the inclusion of 223,000 military women, 11 percent of the forces deployed. Self-report surveys and medical utilization data show little difference between military men and women in rates of PTSD, even though rates for women are higher in the general population. So, one panel ("Female Military Psychiatrists at War") will examine emerging mental health data on women at war and the experiences of women military psychiatrists working in combat zones.

"Consider this a session on how to practice therapy while the rockets are coming in," said Ritchie in an interview.

Years of repeated deployments have also taken their toll on the families of service members, and one session ("Behavioral Health Implications of Parental Wartime Military Service for Military Children, Their Families, and the Treatment Community") will be devoted to military children who are often deeply affected by the physical or psychological injuries incurred by a parent.

No discussion of the effects of combat would be complete without a discussion of PTSD, and at least eight sessions will go beyond the statistics to look at everything from forensic issues to treatment alternatives. One ("Controversies Abound Around PTSD") will address current debates surrounding the disorder, including the argument over its designation as a "disorder" versus "injury" and will explore the possible unintended consequences of disability compensation.

Finally, several sessions will discuss the growing use and acceptance of complementary and alternative approaches for treating those who have experienced the stresses of combat. **PN**

# Spend a Day or Night at the Museum

This spring, several of the museums that people travel from around the globe to visit will be mounting particularly fascinating exhibits.

BY KEN HAUSMAN

Whether you are a lover of the visual arts, an ancient-history buff, or a devotee of science and its many mysteries, New York museums will provide an array of tempting diversions in your time away from the annual meeting's scientific sessions.

A real treat awaits at the **Museum of Modern Art (MoMA)** this spring, especially for those interested in architecture, with the exhibit "Frank Lloyd Wright and the City: Density vs. Dispersal," which "examines the tension in Wright's thinking about the growing American city in the 1920s and 1930s, when he worked on radical new forms for the skyscraper and on a comprehensive plan for the urbanization of the American landscape titled 'Broadacre City.'" Included is a huge 12-foot-by-12-foot model of the plan, complete with highway flyovers and farm areas.

Also at MoMA is an exploration of about 150 of Paul Gauguin's prints and transfer drawings in the exhibit "Gauguin: Metamorphoses." The museum notes that "these remarkable works on paper reflect Gauguin's experiments with a range of mediums, from radically 'primitive' woodcuts that extend from the sculptural gouging of his carved wood reliefs to jewel-like watercolor monotypes and large, mysterious transfer drawings."

The **Metropolitan Museum of Art** is so vast—it's four blocks long—and its collections so deep—encompassing more than 2 million works—that it's best to pick up a guide at the information desk and concentrate on just a few favorite periods or styles. The Met is perhaps best known for its extensive collections of ancient, Medieval, and Renaissance art and artifacts. It's Egyptian collections are especially renowned. But a museum visitor can also take a geo-

graphic approach, choosing gallery destinations that include the art of the Near East, Africa, Oceania, Asia, and ancient Greece, Rome, and Etruria.

Among the special exhibits that the Met will mount during the annual meeting is one with the somewhat unwieldy title "The Nelson A. Rockefeller Vision in Pursuit of the Best in the Arts of Africa, Oceania, and the Americas." Rockefeller, who died in 1979, was a former U.S. vice president, four-time governor of New

York, and scion of one of America's richest families who wanted to do something about the Met's lack of depth in art from these areas and establish them as part of the tradition of producing and collecting fine art. His collecting led to the establishment of a wing of the museum to house these works.

Another exhibit sure to draw large crowds is "Fabergé From the Matilda Geddings Gray Foundation

Collection." Gray was a Louisiana heiress who began acquiring works by Russian artist and jeweler Peter Carl Fabergé in 1933. She eventually compiled one of the world's largest assemblages of his work, many of them commissioned by the Romanov family of Russian czars. Three of the famed imperial Easter eggs are on view, among many others of his intricate jewel-encrusted creations. This is the first time Fabergé works have been on view to the public in New York since 2004.

A very different viewing experience is available at the **American Museum of Natural History**—one in which the wonders of science are made fun and exciting for all ages.

How much more intriguing could an exhibit title be than "The Power of Poison"? This exhibit "explores poison's paradoxical roles in nature, myth, and human health—as a defense against predators, source of strength, or lethal weapon-turned-lifesaving treatment." One section, for example, pulls back the curtain on myths about enchantment or death by poison that actually contain some truth to them. Another delves into "some of history's most intriguing poison cases," several of which continue to baffle researchers and forensic scientists. Visitors can also participate in "a live presentation about a real-world poisoning case and key advances in toxicology," the museum notes.

Exhibit halls are also dedicated to the museum's vast collection of fossils, including its famous dinosaur exhibits; birds, reptiles, and amphibians; and biodiversity and the environment.

If you want to give your feet a rest, a spectacular film at the museum may be just the tonic you need. "Mysteries of the Unseen World"—shown in 3D or 2D—takes viewers "into earthly worlds secreted away in different dimensions of time and scale," the museum notes. "Viewers will experience events that unfold too slowly for human perception; they will enter the microscopic world that was once reserved only for scientists." The film uses high-speed and time-lapse photography, electron microscopy, and nanotechnology to convey its message about "the wonder and possibilities of science." **PN**

Paul Gauguin, whose 1892 work, *Mata mua (In Olden Times)* is shown above, is the subject of a Museum of Modern Art exhibit on his experiments with various media, including woodcuts, paper, and large transfer drawings.

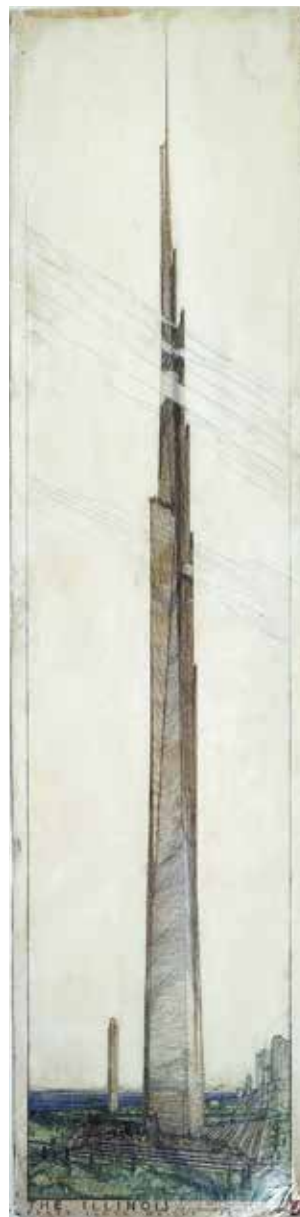

In the 1920s and 1930s, famed architect Frank Lloyd Wright developed a detailed vision of what he thought the American city of the future would look like. The Museum of Modern Art exhibit "Frank Lloyd Wright and the City: Density vs. Dispersal" explores that vision in a huge model and multiple drawings.

Chef Michael Anthony's seasonal menu consists of elegant dishes with a rustic influence that showcase the restaurant's relationships with local farms and purveyors.

## Discover Why Food Lovers Flock to New York

**New York's high-end dining palaces don't fail to wow the dedicated food lover and are worth a splurge, but less-expensive and just as adventurous spots beckon as well.**

BY DAVID MCDOWELL, M.D.

**F**rom the amazing food trucks that dot midtown, offering some of the best food in the world, to the halls of five-star restaurants that offer rare delicacies and feats of culinary acrobatics at "robber-baron" prices, New York has something for everyone who loves food.

David McDowell, M.D., is an assistant professor of psychiatry at Mt. Sinai Medical Center and in private practice in New York.

The jewels of the city and certainly some of the more popular fine-dining establishments have had their share of publicity, and deservedly so: Per Se, Le Bernardin, Daniel, Nobu, Jean Georges, and the Four Seasons are but a few of the most notable names. These all have wonderful food, comfortable and lush surroundings, impeccable service, and wine lists from heaven, but with prices that also look skyward. While there have been some new additions, the very highest echelon of restaurants has remained relatively unchanged since the last time New York hosted the APA annual meeting a decade ago. If you are on an expense account, some rich friend is hosting you, or you just won the lottery, by all means GO!

Here is an eclectic list of some less-well-known gems that should provide a good start if you want to be a bit more adventurous and are looking to explore the world of

New York eating. If you don't find something you like in the list below, don't fret; New York has more than 4,200 restaurants from which to choose. I am sure you will find something you like.

- **Annisa:** In the West Village. It's small, spare, casual, and refined and focuses on the food (eclectic) and not the scene. Everything a restaurant should be. From the beginning of the meal to its end, it is about the food. Oh, but wait. I forgot. There's that wine list. And then you notice: all of the wines are made by women! It is a consistent gem.

- **Gramercy Tavern:** In this sublime American bistro, the more formal dining room is in the back, and the less formal is in the front bar area. It has a deep wine list. This restaurant has been around long enough to be considered an institution. It never fails to impress.

- **Joe's Shanghai:** The flagship restaurant in Chinatown and its outposts around town are all wonderful. Fast, pleasant service and an extensive menu are some of the allures of this basic, authentic, and exquisite Chinese restaurant. But the primary reason to dine here is for its famous soup dumplings. These amazing broth-filled treats, eaten with a spoon, are not to be missed.

- **Keens Steakhouse:** This is my favorite steakhouse in New York. Many of the pickiest critics agree with me. It was the favorite of my father, his father, and his father as well. There is a lot of history here. Get a mutton chop at this century-old steakhouse that offers delicious food, perfect cocktails, and a killer ambiance. Those on a budget can head to the bar room. Make sure you ask for a tour of the place. You'll

see some unique historical artifacts, including the bloodied playbill Lincoln was holding when he was assassinated.

- **Mas (farmhouse) and Mas (grillade):** The farmhouse is formal foodie dining in a perfectly romantic setting, and the cuisine is New American/French. It is perfectly thought-out and serene. Its smallish space will envelop and warm you. Mas grillade is the larger, more casual, and less-expensive venue. Almost every dish has been cooked over a wood fire.

- **Momofuku Ssam Bar:** Asian medley and completely fabulous. This lively, energetic eatery offers up an array of fun, easy-to-share, and delicious treats. The to-die-for noodles are a highlight of the restaurant's inventive menu.

- **Rouge Tomate:** This restaurant, located near the Plaza Hotel just off Fifth Avenue, has it all: an exquisite airy and light-filled room, innovative food, and dramatic presentation. The high prices suggest it is probably best managed with an expense account, but it is totally worth it. Like everything else here, its wine list is top notch—you can't go wrong—and is overseen by an incredibly knowledgeable sommelier.

So enjoy these suggestions. In a future issue, I will offer up some more suggestions for the more budget-conscious attendee. **PN**

##### Imaging Biomarkers for Neuropsychiatric Disorders: Are We There Yet?

1. Toward Neural Biomarker Identification in ADHD and Autism Spectrum Disorder *Francisco Castellanos, M.D.*
2. The Development of Imaging Biomarkers for Mood Disorders *Wayne Drevets, M.D.*
3. Imaging Biomarkers Associated With Cognitive Decline *Yvette Sheline, M.D.*
4. The Development of Imaging Biomarkers for Psychotic Disorders *Cameron Carter, M.D.*

##### The Classification of Psychotic Disorders in DSM-5 and ICD-11: The Role of Field Trials and How They Inform Classification

1. Design of the ICD-11 Field Trials for Psychotic Disorders *Jürgen Zielasek, M.D.*
2. The Role of Field Trials in Developing the Classification of Mental Disorders in ICD-11 *Geoffrey M. Reed, Ph.D.*
3. Psychotic Disorders in ICD-11: Suggestions for Revised Clinical Descriptions and Diagnostic Guidelines *Wolfgang Gaebel, M.D., Ph.D.*
4. Preliminary Results of ICD-11 Internet-Based Field Trials for Psychotic Disorders *Jared W Keeley, Ph.D.*
5. Classification of Psychotic Disorders in DSM-5: The Impact of Field Trials *Rajiv Tandon, M.D.*

##### Testimony Regarding Behavioral Genomics at Criminal Trials

1. Rationale for Positing an Interaction of Childhood Maltreatment and MAOA Genotype in the Prediction of Antisocial Behavior *Stephen B. Manuck, Ph.D.*
2. MAOA, Childhood Maltreatment, and Antisocial Behavior: Meta-Analysis of a Gene-Environment Interaction *Amy L. Byrd, M.S.*
3. Behavioral Genetic Evidence: Conceptual and Practical Challenges

*Paul S. Appelbaum, M.D.*

4. Behavioral Genetic Evidence in Criminal Cases: 1994-2011 *Deborah Denno, J.D., Ph.D., M.A.*
5. Testimony Regarding MAOA and SLC6A4 Genotyping at Criminal Trials *William Bernet, M.D.*

##### Advances in Pediatric Bipolar Disorder Research

1. Reexamining the Risk for Switch From Unipolar to Bipolar Major Depressive Disorder in Youth With ADHD *Joseph Biederman, M.D.*
2. The Clinical Characteristics of Unipolar vs. Bipolar Depression in Youth: A Qualitative Review of the Literature *Mai Uchida, M.D.*
3. How Cardinal Are Cardinal Symptoms in Pediatric Bipolar Disorder?: A Familial Risk Analysis *Janet Wozniak, M.D.*
4. Glutamatergic Metabolites in Pediatric Bipolar and Other Childhood Psychiatric Disorders *Andrea E. Spencer, M.D.*

##### The New York State SAFE Act: Mandatory Reporting as an Attempt to Limit Gun Violence by Individuals With Mental Illness

1. Ethical Challenges of the NYS SAFE Act *Arthur Caplan, Ph.D.*
2. The Broad Reach of the NYS SAFE Act: Is a Legislative Mandate Imposed on Mental Health Professionals an Effective and Ethical Method for Addressing Access to Firearms by Potentially Dangerous Patients? *Wendy Luftig, J.D.*
3. The New York State Safe Act: An Attempt to Limit Gun Violence by Individuals With Mental Illness Through Mandatory Reporting *Amit Rajparia, M.D.*

##### Management of the Noncognitive Signs and Symptoms of Dementias/ Major Neurocognitive Disorders: A Systems View of Individualized Treatments *APA Council on Geriatric Psychiatry*

dade72/Shutterstock

1. Current Perspectives on the Assessment and Management of the Behavioral and Psychological Symptoms of Dementias/Major Neurocognitive Disorders (MNDS) *Helen H. Kyomen, M.D., M.S.*

2. Lean Behavioral Management of Neurocognitive Disorders *Robert P. Roca, M.D., M.P.H., M.B.A.*

3. How to Provide a Comprehensive Continuum of Care Program for Elderly With Dementias/Major Neurocognitive Disorders (MNDS) *Anne Ellett, M.S.N., N.P.*

##### Risk, Vulnerability, and Resilience: An Epigenetic Trajectory of Psychiatric Disorders

1. Epigenesis: A Novel Tool to Discover the Genetic Mystery of Psychosomatic Disorders *Amarendra N. Singh, M.D., D.P.M.*
2. Hypothalamic-Pituitary-Adrenal (HPA) Axis Genes in Suicide Brain: Role in Suicide *Ghanshyam N. Pandey, Ph.D.*
3. Resilience: An Independent Neurobehavioral Construct for Psychopathology *Amresh K. Shrivastava, M.D.*
4. Neurochemistry of Chronic Stress: Cortisol-Induced Serotonin Reuptake *Gustavo E. Tafet, M.D., Ph.D.*

##### The Evolution of Clinical Trial Design Methodology in Bipolar Disorder

1. Trial Design for Acute Mania: Consensus in the Field *Mark Frye, M.D.*
2. Maintenance Study Design That Yields Patient-Level Relevance and Advances Scientific Knowledge on Treatments for Bipolar Disorder *Charles L. Bowden, M.D.*
3. Balancing Generalizability and Assay Sensitivity Needs in Bipolar Depression Treatment Trials *Joseph R.*

*Calabrese, M.D.*

4. Comparative-Effectiveness Research in Bipolar Disorder *Susan McElroy, M.D.*

##### What's the Difference That Makes the Difference? Demonstration of Commonalities and Differences Across Efficacious Treatments for BPD

1. Demonstrating Mentalization-Based Therapy *Anthony Bateman, M.D.*
2. Demonstrating Transference-Focused Therapy *Otto F. Kernberg, M.D.*
3. Demonstrating Dialectic Behavior Therapy *Martin Bohus, M.D.*
4. Demonstrating the TARA Method of Family Psychoeducation *Valerie Porr, M.A.*

##### Imaging Biomarkers for Neuropsychiatric Disorders: Are We There Yet?

1. Toward Neural Biomarker Identification in ADHD and Autism Spectrum Disorder *Francisco Xavier Castellanos, M.D.*

##### Diagnostic and Assessment Considerations for the Treatment of Comorbid Opioid Addiction and Chronic Pain *U.S. National Institute on Drug Abuse*

1. Overview of the Treatment of Acute and Chronic Pain in the Patient With a History of Addiction *Sean Mackey, M.D., Ph.D.*
2. CTN and the Use of Buprenorphine for Addiction to Opioid Analgesics *Roger D. Weiss, M.D.*
3. Transition of Acute to Chronic Pain *Ian Carroll, M.D., M.S.*
4. Hyperesthesia and Its Relationship to Opioid Tolerance, Chronic Pain, and Addiction Potential *Roger Chou, M.D.*
5. fMRI-Based Biomarker for Clinical Pain and Analgesia *Tor Wager, Ph.D.*

#### IMGs' Role in Psychiatry Around the Globe to Be Discussed

International medical graduates (IMGs) are invited to gather for the IMG Summit, whose centerpiece is a special symposium titled "Global Psychiatric Education and Practice: Role of International Medical Graduates in American Psychiatry." The summit will be held on Saturday, May 3, from 9 a.m. to 5 p.m. in the Empire West Room, Second Floor, Sheraton New York Times Square Hotel. The coordinator of the summit is Nyapati Rao, M.D., M.S., the Von Tauber Chair of Psychiatry Chief and Academic Officer at the Nassau University Medical Center.

The symposium will be presented by APA's Division of Diversity and Health Equity, the APA Caucus of International Graduate Psychiatrists, and the Committee on Globalization of the Group for the Advancement of Psychiatry. Residents, physicians, educators, administrators, and interested others are welcome to attend. Attendance is free, but registration is advised since space is limited. RSVP to Alison Bondurant at (703) 907-8639 or at [Diversityatapa@psych.org](mailto:Diversityatapa@psych.org) as soon as possible.

Among the distinguished speakers at the summit will be Darrell Kirch, M.D., president and CEO of the Association of American Medical Colleges, who will deliver the keynote address.

**8 A.M.-NOON  
COURSES 9-13****SEMINARS**

**Risk Assessment for Violence** *Director: Phillip Resnick, M.D.*

**Neuroanatomy of Emotions** *Director: Ricardo Vela, M.D.*

**Barriers to Adult Sexual Love: A New Conceptual and Clinical Approach** *Director: Stephen B. Levine, M.D.*

**HIT (Hallucination-Focused Integrative Therapy): Preferred for Acoustic Verbal Hallucinations?** *Directors: Jack J.A. Jenner, M.D., Ph.D., Bert L.B. Luteijn, M.D.*

**9 A.M.-4 P.M.  
COURSES 14-18****MASTER COURSE 3****10 A.M.-11:30 A.M.  
ADVANCES IN MEDICINE**

**Mind/Body Medicine: The Link Between Clinical Medicine and Public Health** *Chair: Gregory L. Frichione, M.D.*

**INTERACTIVE SESSIONS**

**How I Became Me** *Chair: Glen O. Gabbard, M.D.*

**A New DSM-5 "Alternative Model" for the Personality Disorders** *Chairs: John M. Oldham, M.D., Andrew Skodol, M.D.*

**SCIENTIFIC AND CLINICAL REPORTS****Child and Adolescent Psychiatry**

1. Suicide Attempts in Private School Adolescents *Rosemary C. Baggish, M.Ed., M.P.H., Peter H. Wells, Ph.D.*

2. Hoarding Disorder in Adolescence: Phenomenology and Clinical Correlates *Volen Z. Ivanov, M.Sc.*

3. Neuronal Pruning in Adolescence: Do Memes Play a Role? *Hoyle Leigh, M.D.*

4. Do Parents' and Teachers' Assess-

ments of ADHD Symptomatology Vary Based on Their Gender and the Gender of the Child? *Venkat Bhat, M.D.*

**Opioid and Inhalant Abuse**

1. Abstinence From Drugs of Abuse in Community-Based Members of Narcotics Anonymous *Marc Galanter, M.D.*

2. Denial of Urinalysis-Confirmed Opioid Use in a Prescription Opioid Dependence Treatment Study: Prevalence, Characteristics, and Patterns *Margaret L. Griffin, Ph.D.*

3. Draw-a-Person Test in Inhalant Abusers Versus Normal: A Comparative Study, Significance of Interpretation in Clinical Practice *Sanjeev Prasad, M.D.*

**WORKSHOPS**

**Amyloid Imaging: Using a New Biomarker to Improve Diagnosis** *Chair: Yvette I. Sheline, M.D.*

**Mind/Body Practices for Trainees: Reducing Stress, Enhancing Empathy, and Treating Patients Integratively** *Chairs: Richard P. Brown, M.D., Patricia L. Gerbarg, M.D.*

**Master Course to Explain Fine Points of DSM-5**

Following the release of the fifth edition of the *Diagnostic and Statistical Manual of Mental Disorders (DSM-5)* at least year's APA annual meeting, the Division of Research will repeat its all-day master course at this year's annual meeting to further train clinicians on the proper use of the revised manual. "DSM-5: What You Need to Know" will be held on Saturday, May 3, from 9 a.m. to 4 p.m. at the Hilton Hotel New York and will be chaired by DSM-5 Task Force Chair and Vice Chair David Kupfer, M.D., and Darrel Regier, M.D., M.P.H. The course will feature presentations from members of each of the 13 DSM-5 work groups.

In addition to reviewing the most significant diagnostic criteria changes of clinical relevance, presenters will orient attendees to other important issues impacting patient care, including abolishment of the multiaxial system; DSM-5's revised approach to dimensional assessment, including that of disability; the purpose and use of the new ICD-10-CM codes; the reasoning behind DSM-5's new chapter structure; and more. More than 500 people registered for the last year's DSM-5 master course, so register soon since high attendance is expected this year as well. Here is the course content:

- David Kupfer, M.D.: Orientation to course and overview of DSM-5 chapter organization
- Darrel Regier, M.D., M.P.H.: Use of the manual
- Susan Swedo, M.D.: Neurodevelopmental disorders
- William Carpenter, M.D.: Psychotic disorders
- B. Timothy Walsh, M.D.: Eating disorders
- Jan Fawcett, M.D.: Depressive and bipolar disorders
- Robert Ursano, M.D.: Trauma and dissociative disorders
- Katharine Phillips, M.D.: Anxiety and OCD disorders
- Joel Dimsdale, M.D.: Somatic disorders
- Ruth O'Hara, M.D.: Sleep disorders
- Kenneth Zucker, Ph.D.: Sexual dysfunctions, gender dysphoria, and paraphilic disorders
- Charles O'Brien, M.D., Ph.D.: Substance-related disorders
- David Shaffer, M.D.: Disruptive, impulse control, and conduct disorders
- Ronald Petersen, M.D., Ph.D.: Neurocognitive disorders
- Andrew Skodol, M.D.: Personality disorders
- Darrel Regier, M.D., M.P.H., and William Narrow, M.D., M.P.H.: Disability assessment, v/z codes, and forensic and insurance issues
- Audience discussion

To register for the course, see the insert at page 13.

**Comprehensive Care for Patients With Medical and Psychiatric Comorbidity: A New Model of Care and Opportunity for Psychiatrists** *Chair: Steven Frankel, M.D.*

**Sleep Disorders: Assessment and Intervention in Military Service Members** *Chair: Paul Sargent, M.D.*

**Special Psychiatric Rapid Intervention Team (SPRINT) and the Art of Disaster Psychiatry in the Navy** *Chairs: Jeffrey Millegan, M.D., M.P.H., Elspeth C. Ritchie, M.D., M.P.H.*

**OMNA on Tour: Community Convener and Catalyst for Collaborative Action to Improve Mental Health in Diverse and Underserved Populations** *Chair: Annette Primm, M.D., M.P.H.*

**Rethinking Kendra's Law: The Ethics of Assisted Outpatient Treatment** *APA Ethics Committee and Penn-Scattergood Ethics Program; Chair: Candice T. Player, J.D., Ph.D.*

**Making the Most of Your Chief Year: Chief Residents' Forum I** *Chairs: Marra Ackerman, M.D., Rachel Caravella, M.D.*

**Combined Pharmacologic and Psychotherapeutic Management of Tourette's Disorder** *Chair: Deepak Prabhakar, M.D., M.P.H.*

**Somatic Symptom and Related Disorders in Children and Adults: A Clinical Approach** *APA Child and Adolescent Psychiatry Fellowship; Chair: Jessica Crawford, M.D.*

**The Role of the Psychiatrist in Deep Brain Stimulation** *Chair: Sarah M. Fayad, M.D.*

**Cognitive-Behavior Therapy-Based Group Treatment of Depression** *Chairs: Jerry Halverson, M.D., Rachel C. Leonard, Ph.D.*

#### 1 P.M.-4 P.M. MEDIA WORKSHOP

**"Afflictions: Culture and Mental Illness in Indonesia"** *Chair: Robert Lemelson, Ph.D.*

#### Got a Question For APA's Leaders?

All APA voting members are invited to attend APA's Annual Business Meeting and Annual Forum at the 2014 annual meeting. The Annual Business Meeting informs members about the state of the Association and its activities and accomplishments over the past year. At the Annual Forum, APA voting members are invited to ask questions of and share comments with APA leaders.

#### SUNDAY, MAY 4

12:30 p.m.-2 p.m.

#### Annual Business Meeting and Annual Forum

Westside Ballroom 1-4, Fifth Floor, New York Marriott

#### PRESIDENTIAL SYMPOSIUM

**Epidemiology and Treatment of Patients With Comorbid Psychiatric and Medical Illness** *Academy of Psychosomatic Medicine; Chairs: Michael Sharpe, M.D., Wayne J. Katon, M.D.*

1. Depression and Diabetes: A Potential Lethal Combination *Wayne J. Katon, M.D.*

2. Epidemiology and Treatment of Patients with Comorbid Psychiatric and Medical Illnesses *Jeff Huffman, M.D., Ph.D.*

3. Treatment of Patients With Depression and Cancer *Michael Sharpe, M.A., M.D.*

4. Chronic Medical Illness and Severe Mental Illness *Lydia Chwastiak, M.D., M.P.H.*

#### SYMPOSIA

**Trauma and Stress-Related and Dissociative Disorders in DSM-5**

1. Trauma and Stressor-Related Disorders *David Spiegel, M.D.*

2. Acute Stress Disorder In DSM-5 *Robert J. Ursano, M.D.*

3. Dissociative Disorders and the Dissociative Subtype of PTSD *Roberto Lewis-Fernandez, M.D.*

4. Persistent Complex Bereavement Disorder *Robert Pynoos, M.D.*

**Bipolar Disorder: An Update on Diagnosis and Treatment**

1. Efficacy and Effectiveness: How the BALANCE and Litmus Trials Should Inform Lithium Use in Bipolar Disorder *Michael J. Ostacher, M.D., M.P.H.*

2. Treating Depression With DSM-5-Defined Mixed Specifier *Roger S. McIntyre, M.D.*

3. Antidepressants in Bipolar Illness: An Update *Frederick K. Goodwin, M.D.*

4. Anticonvulsants in Bipolar Disorder: An Update *Terence A. Ketter, M.D.*

5. The Bipolar Diagnosis Debate: Over, Under, or Neither? *S. Nassir Ghaemi, M.D., M.P.H.*

**"To Sleep or Not to Sleep": Psychotropics and Sleep Architecture**

1. Neurobiology of Sleep *Durga Prasad Bestha, M.B.B.S.*

2. Sleep Architecture and Psychiatry *Venkata B. Kolli, M.B.B.S.*

3. Psychotropics and Sleep *Alexandra E. Schuck, M.D.*

4. "Inviting the Sleep Fairy": Developmental Sleep Patterns and Challenges in Pediatric Sleep Disorders *Vishal Madaan, M.D.*

**The Role of Substance Use in Violence Against Self and Others: How Research Can Inform Clinical Understanding of Risk** *U.S. National Institute on Drug Abuse*

1. Substance Use as a Proximal Risk Factor for Suicidal Behavior in Adoles-

Manana/Shutterstock

cents With Bipolar Disorder *Tina R. Goldstein, Ph.D.*

2. Impulsivity and Underlying Mechanisms of Risk for Suicide and Aggression in Substance-Abusing Adolescents *Donald M. Dougherty, Ph.D.*

3. Alcohol and Suicidal Behavior: Role of Acute Alcohol Use and Alcohol Use Disorder *Kenneth R. Conner, M.P.H., Psy.D.*

4. The Role of Substance Use in Community Violence by People With Mental Disorders *Edward P. Mulvey, Ph.D.*

**Gender Identity and Gender Dysphoria for the Practicing Psychiatrist**

1. Gender Identity, Terminology, Nomenclature, and Concepts in Modern Psychiatric Approaches to Gender Variance *Jack Pula, M.D.*

2. Gender Variance and Gender Dysphoria From Childhood Through Adolescence *Richard R. Pleak, M.D.*

3. Evolution of Approaches to Gender in Somatic Intersexuality *Heino F. L. Meyer-Bahlburg, Ph.D.*

4. Adult Psychiatric Practice in Transgender Medical and Mental Health Care *A. Evan Eyler, M.D., M.P.H.*

5. Expanding Access to Transition-Related Care: Clinical Implications for Psychiatrists *Dan H. Karasic, M.D.*

**Temperament and Adversity in BPD** *North American Association for the Study of Personality Disorders*

1. Concordance and Discordance in BPD Families *Joel Paris, M.D.*

2. The Association Between Borderline Personality Disorder in Adolescents, Childhood Adversity, and Temperament *Mary Zanarini, Ed.D.*

3. Personality Traits and Neurobiological Mechanisms Underlying BPD *Antonia New, M.D.*

4. Borderline Personality in Young People: Risk Factors, Precursors, and Early Signs *Andrew M. Chanen, M.B.B.S., Ph.D.*

**An Alternative Model for Personality Disorders: DSM-5 Section III and Beyond**

1. Development and Initial Empirical Data on the Alternative Model for Personality Disorders in DSM-5 *Andrew Skodol, M.D.*

2. Can Laypersons Assess DSM-5 Levels of Personality Functioning and Maladaptive Personality Trait Facets *Johannes Zimmermann, Ph.D.*

3. Current Research on the DSM-5 Alternative Model for Personality Disorders and Its Use in the Clinic *Robert F. Krueger, Ph.D.*

4. Clinical Application of the DSM-5 Section III Personality Disorder Model *Donna S. Bender, Ph.D.*

**Quality Improvement Initiatives: International Perspectives** *World Psychiatric Association*

1. Guidelines, Quality Indicators, Quality Management: Regulations and Results From Germany *Wolfgang Gaebel, M.D., Ph.D.*

**REGISTER NOW FOR MEETING  
AND SAVE ON FEES!**

See insert at page 13 for registration information. Advance registration fees are now in effect, and you can save even more by registering online.

2. Fukushima Project: Nuclear Disaster Stress Relief *Tsuyoshi Akiyama, M.D., Ph.D.*

3. Quality Improvement in Low- and Lower-Middle-Income Countries *Jaganathan Srinivasaraghavan, M.D.*

4. Patient-Centered and Equitable Health Care as Quality Indicators: Applications for Mental Health *Francis Lu, M.D.*

5. Physician Consortium on Performance Improvement and Major Depressive Disorder Measure Set *John S. McIntyre, M.D.*

### Advances in Treatment Strategies for Agitation in Alzheimer's Disease

1. Effect of Citalopram on Agitation in Alzheimer's Disease—The CitAD Randomized, Controlled Trial *Constantine Lyketsos, M.D., M.H.S.*

2. Managing the Neuropsychiatric Symptoms of Dementia: Rolling the Dice With Usual Care vs. the Interdisciplinary DICE Approach *Helen C. Kales, M.D.*

3. Antipsychotic Treatment and Discontinuation in Patients With Alzheimer's Disease *Davangere P. Devanand, M.D.*

### Collaborating for Change: The TARA Method: Improving Borderline Personality Disorder Functioning and Outcomes With Family and Consumer Psychoeducation

1. Demonstration of the TARA Method: Talking to the Amygdala in Emotional Language to Improve Communication, Trust, and Repair Relationships and Change Strategies to Develop Independence, Trust, and Competency *Regina Piscitelli*

2. Applying TARA Method Training in Neurobiology and Family Issues to Develop Compassion for Individuals With BPD in Psychology Graduate Programs *Olivia Mandelbaum, B.A.*

3. Impact of BPD on Siblings, Partners/Spouses, and Children of People With BPD; Adaptations of the TARA Method Techniques for Specific Relationships *Sarah Piscitelli, M.A.*

4. Highlights of Key Components of the TARA Method Curriculum for BPD Family Psychoeducation *Valerie Porr, M.A.*

5. A Person With BPD's Perspective: "Finally, I Get Me"—The Positive Impact of BPD Psychoeducation on My Relationships, Who I Am, and My Treatment *Maria Scazzero*

### 2 P.M.-4 P.M. POSTER SESSION

#### International Poster Session 2

### 2:30 P.M.-4 P.M. INTERACTIVE SESSIONS

Meet the Authors: Normal Child and Adolescent Development: A Psy-

chodynamic Primer *American Psychiatric Publishing Editorial Board; Chairs: Karen J. Gilmore, M.D., Pamela Meer-sand, Ph.D.*

**Sexuality, Aggression, and Identity in Love Relations** *Chair: Otto F. Kern-berg, M.D.*

### LECTURE

**Developing a Forensic Practice: A Guide for General Psychiatrists** *Manfred S. Guttmacher Award Lecture; Wil-liam H. Reid, M.D.*

### SCIENTIFIC AND CLINICAL REPORTS

#### Psychiatry and the Military

1. Long-Term Mental Health and Functioning Outcomes of Military Sexual Trauma in Vietnam-Era Female Veterans *Kathy M. Magruder, M.P.H., Ph.D.*

2. Synthetic Cannabinoid Agonists and an Active-Duty Military Residen-tial Substance Abuse Program *George Loeffler, M.D.*

3. Trauma and Abuse Histories Among Male Veterans With PTSD and Co-Occurring Substance Use Disorders *Andrew Teer*

4. Cytokine Production as a Marker of Stress Sensitization in High-Combat-Exposed Soldiers *Geert E. Smid, M.D., Ph.D.*

#### Neuromodulation

1. TMS: Expanding the Scope of TMS: New Disorders, New Brain Tar-gets, Integration With Neuroimaging/ EEG, Better Patient Selection *Alan Z. Manevitz, M.D.*

2. Maintenance RTMS Treatment for Resistant Depressed Patients: A One-Year Double-Blind Study *Rene Benad-hira, M.D.*

3. A Randomized, Double-Blind, Sham-Controlled Clinical Trial of RTMS for Generalized Anxiety Disorder *Gretchen Diefenbach, Ph.D.*

4. Transcranial Magnetic Stimu-lation for Depression Also Improves Anxiety Symptoms: A Meta-Analysis of Randomized, Controlled Trials *Bethany M. Wootton, Ph.D.*

### WORKSHOPS

**The Evidence-Based Guide to Anti-depressant Medications and Antipsy-chotic Medications** *Chair: Anthony J. Rothschild, M.D.*

**Food and the Brain** *Chairs: Emily Deans, M.D., Drew Ramsey, M.D.*

**Criminal Defense Consulting on Defendants With PTSD Related to Deployment in Iraq and Afghanistan** *Chairs: Nathan L. Pilgrim, D.O., M.P.H., Keith A. Caruso, M.D.*

**The Issue of Bias in Forensic Psychi-atry** *APA Ethics Committee and Penn-Scattergood Ethics Program; Chairs: Claire Pouncey, M.D., Ph.D., Robert L.*

### Preparing Tomorrow's Psychiatric Leaders Today

Established in 1968, the American Psychiatric Leadership Fellowship helps to develop APA residents into distinguished leaders in the field of psychiatry. Please take a moment to recognize the Leadership Fellows attending APA's 2014 annual meeting.

#### Class of 2014

Uyen-Khanh Quang-Dang, M.D., M.S.

Patricia Dickmann, M.D.

Hassan Minhas, M.B.B.S., M.D.

Arshya Vahabzadeh, M.D.

Yvonne Yang, M.D., Ph.D.

#### Class of 2015

Bibhav Acharya, M.D.

Smita Das, M.D.

R. Scott Johnson, M.D.

Ayana Jordan, M.D.

Brent Nelson, M.D.

Desiree Shapiro, M.D.

Residents and early career psychiatrists interested in learning media-engagement best practices and other psychoeducational media opportunities are encouraged to attend the workshop, "Media Training 101 for Residents and Early Career Psychiatrists: A Hands-On, Interactive Experience" on Saturday, May 3, at 11 a.m. in Room 1D05/06, Level 1, Javits Convention Center. The workshop is supported by the American Psychiatric Leadership Fellowship.

To learn more about the American Psychiatric Leadership Fellowship program and Leadership Fellow accomplishments, go to [www.americanpsychiatricfoundation.org/leadershipfellow](http://www.americanpsychiatricfoundation.org/leadershipfellow).

*Sadoff, M.D.*

**Making the Most of Your Chief Year: Chief Residents' Forum II** *Chairs: Marra Ackerman, M.D., Rachel Cara-vella, M.D.*

**Mentors! Find One, Be One** *Senior Psychiatrists; Chairs: Sheila Hafter-Gray, M.D., Nada L. Stotland, M.D., M.P.H.*

**Treating Patients With Visual Loss: Finding Light in the Darkness** *Chairs: Michael S. Ascher, M.D., Sharon Packer, M.D.*

**The B in LGBT** *Chair: Daniel Medeiros, M.D.*

**Helping Your Patients With Seri-ous Mental Illnesses Have a Mean-ingful Day: Lessons Learned From the Opening Doors to Recovery Project** *Chair: Michael T. Compton, M.D., M.P.H.*

**Workforce Development in Inte-grated Care: A Multidisciplinary Approach for Health Care Systems** *Chairs: Robert C. Joseph, M.D., M.S., Kimberly Leary, M.P.A., Ph.D.*

**The Suicidal Patient: Assessment and Management** *Chair: Jan Fawcett, M.D.*

### 4:30 P.M.-6:45 P.M. OPENING SESSION

**Followed by a Dialogue With Nobel Laureate Eric R. Kandel, M.D., and Actor Alan Alda** *Moderator: Jeffrey A. Lieberman, M.D., APA President*

### 7 P.M.-10 P.M. MEDIA WORKSHOP

**"Six Million and One"** *Chairs: Anna Balas, M.D., David Fisher*

## Museum

*continued from page 9*

have got to have this building.' It was perfect."

Researchers scavenged through 97 Orchard and combed through archives, compiling evidence about tenants and tenement life. In 1992 the Museum opened its first restored apartment, the 1878 home of the German-Jewish Gumpertz family.

The museum continues to expand. In January, museum leaders announced plans for new permanent exhibits exploring the stories of Chinese immi-grants, Jewish Holocaust survivors, and Puerto Rican migrants who began new lives on the Lower East Side after World War II. The museum will honor the experiences of these more recent

immigrants in conjunction with the German, Irish, Italian, and Eastern European immigrant stories that it cur-rently interprets.

"Now more than ever, the Tenement Museum's mission and work are deeply relevant," said Museum President Mor-ris J. Vogel in a statement on the museum website. "The story of our nation's immi-grants is America's defining narrative, and the joys and challenges of estab-lishing new lives and new communities continue for present-day immigrants around the world. We're proud and excited that we'll soon be able to explore a wider range of these stories for a larger audience." **PN**

**2** More information on the Tenement Museum is posted at <http://www.tenement.org/>.

# NIMH to Present Review of Ongoing Research Projects

The National Institute of Mental Health is sponsoring a special research track at the annual meeting that will give psychiatrists a preview of important work in the research pipeline.

BY VABREN WATTS

**A**t this year APA's annual meeting in New York in May, the National Institute of Mental Health (NIMH) will sponsor a three-day symposium and a day of plenary lectures to ensure that attendees are aware of the latest advancements in mental health research and how they could advance the field.

"This year there is not a single focus [of the presentations]. The track is generally an overview of research that is being highlighted by NIMH. If there is any focus at all, it's on interesting research that we are funding, as well

Joyce Chung, M.D., deputy clinical director at the National Institute of Mental Health, is inviting all attendees to attend the NIMH research track symposia.

as themes that we think are intriguing to the public," Joyce Chung, M.D., deputy clinical director of NIMH, told *Psychiatric News*.

The NIMH research track will begin Saturday, May 3, with NIMH Director Thomas Insel, M.D., who will present

the lecture "Psychiatry to Clinical Neuroscience," followed by Steven Hyman, M.D., director of the Stanley Center for Psychiatric Research at the Broad Institute of the Massachusetts Institute of Technology and Harvard, and Gregory Simon, M.D., M.P.H., a senior scientific investigator at the University of Washington, who will discuss psychiatric genetics and the creation of a "learning" mental health care system, respectively.

"We have an incredible lineup," Chung stated. "We chose investigators who are great speakers and who will give a great overview of what's going on in the field."

Monday, May 5, is the start date for the three-day symposium. "Clinical Risk for Psychosis and Early Serious Mental Illness" is the first topic of discussion, chaired by Robert Heinssen, Ph.D., director of the NIMH Division of Services and Intervention Research.

"There are several divisions at NIMH that fund research," Chung explained. "Each symposium is being chaired by one division director at NIMH and is a highlight of some of the different kinds of research that are being funded by that particular division."

Linda Brady, M.D., director of the Division of Neuroscience and Basic Behavioral Science, will chair the session on Tuesday, May 6, titled "Novel Therapeutics for Psychiatric Disorders: Discovery Through Development," which will feature NIMH researcher Carlos Zarate, M.D., discussing the development of rapid-acting antidepressants, such as ketamine.

On Wednesday, May 7, speakers will discuss new ways of classifying psychopathology based on dimensions of observable behavior and neurobiological measures in the symposium titled "Research Domain Criteria (RDoC): New Approaches to Diagnostics." It will be chaired by Bruce Cuthbert, Ph.D., director of the Division of Adult Trans-

## NIDA Dedicated to Unlocking All Aspects of Drug Abuse

Monoclonal antibodies and engineered enzymes may be future treatments for substance use disorders.

BY VABREN WATTS

**T**he National Institute on Drug Abuse (NIDA) funds approximately 2,000 extramural research studies—in addition to intramural projects—each year with hopes of reducing the prevalence of illicit drug use and diversion of prescription medications in the United States. NIDA Director Nora Volkow, M.D., who will deliver a lecture as part of the "Advances in Addiction Research" session at APA's annual meeting in May, discussed with *Psychiatric News* the latest research coming from the agency, as well as the future of substance abuse treatment.

"There is a lot of new research going on at NIDA," Volkow said. "A lot of it relates to genetic and epigenetic processes associated with the brain during developmental periods in order to understand the negative consequences of substance abuse at various stages of

life." She explained that this specific focus is one of much concern because of the increasing regular use of marijuana among American teenagers, which was indicated in responses to the NIDA-sponsored 2013 Monitoring the Future survey (*Psychiatric News*, February 7).

"It's important to know how the brain of an adolescent transitions to that of an adult and how changes during that transitional period increase one's vulnerability for drug use and risky behavior. This kind of research is one of our top priorities," stated Volkow, "and we plan to address these issues with panel discussions in the near future."

Other ongoing research cited by Volkow included investigations of medicines and vaccines for the treatment of substance use disorders (SUDs), as well as new molecular therapies for such indications.

"We have innovative opportunities that relate not just to vaccines but also to monoclonal antibodies, which have long half-lives and alleviate the need to ingest medication repeatedly. Also, we have new enzymes that are engineered to rapidly metabolize an illicit substance before the drug enters the brain. This is the era of new medication and technological development," Volkow noted.

This year, according to Volkow, NIDA has decided to put more emphasis on SUDs and comorbid psychiatric illnesses, as well as the association of drug abuse and violent acts and behaviors.

Another area to which the institute is giving more attention is the diversion of prescription medications. "This is very relevant to psychiatrists because some psychotherapeutic agents can be diverted and result in addiction—in

particular stimulant medication and to a lesser extent barbiturates," explained Volkow. Though analgesics, another class of frequently abused medications, are not often prescribed by psychiatrists, Volkow said that more psychiatrists will be faced with treating those who have diverted or become addicted to such pain therapies.

NIDA is currently working with multiple federal agencies to decrease illicit substance use and drug diversion among certain high-risk populations, including veterans and those incarcerated by state judicial systems. NIDA is also one of four government health institutes involved in the new Brain Initiative, launched last year by President Obama.

"We are involved in research in all areas as it relates to drug abuse—basic science and neuroscience, prevention, implementation, and epidemiology," added Volkow.

When asked about the future of research and clinical practices related to drug abuse, Volkow responded, "By then we will have a much better knowledge of how the brain works and use that knowledge to strengthen those sequences in the brain that are damaged by drugs through technology that may rely on the delivery of magnetic or electrical stimulation or even biofeedback processes. Hopefully there will be a transformation in the culture such that substance abuse disorders are screened and treated as a first line intervention for specialized care." **PN**

Nora Volkow, M.D., director of the National Institute on Drug Abuse, discusses ongoing and new research on several fronts in the battle against addiction.

## Venture Beyond Midtown To Craft Your Own New York Experience

Some special corners of Manhattan are often overlooked by visitors—a park 30 feet in the air, medieval architecture, and ale in a very old bar.

BY AARON LEVIN

The theaters, restaurants, and shopping in central Manhattan are great, but there is always more to see elsewhere on “the island at the center of the world.”

For instance, beginning three blocks from the APA annual meeting's home base at the Javits Convention Center is the northern terminus of one of New York's newest and most unusual attractions, one that is long and tall and thin.

We're talking about the **High Line**: a city park 1.45 miles long, barely wide enough to accommodate two sets of railroad tracks, and sitting 30 feet in the air.

The High Line runs north from Gan-

sevoort Street (below 14th Street in the West Village) up to West 30th Street at 10th Avenue. An extension now under development will carry the park around existing rail yards up to West 34th Street sometime this year.

From 1929 until 1980, the High Line was indeed a railroad, shuttling sacks of mail to the Post Office, foodstuffs to and from factories and warehouses, and sides of beef to the meatpacking district. The rail line was at street level from 1851 to 1929, but the hazards of running trains across streets and alleys became so apparent that the elevated road bed was constructed.

The tracks were built not over the street but through the middle of the blocks traversed, allowing trains to stop next to or even enter the industrial buildings along the way. The last train, carrying three carloads of frozen turkeys, made its way along the High Line in 1980.

Area residents helped preserve the High Line from demolition in the 1990s. Work began in 2006, and the park opened in stages in 2009 and 2011.

Today the High Line is one long walking path, accented by plantings, special viewing locations, a horticultural preserve (at West 16th Street), a gift shop, and amphitheater. Food vendors offer snacks and there's also an open-air cafe, Terroir at The Porch.

### Medieval Europe Finds New York Home

To the north, far from the traffic-choked streets of Midtown but still attached to Manhattan, lies **Fort Tryon Park**, home to **The Cloisters**. Reconstructed from elements taken from five

The Metropolitan Museum of Art, New York

The Cloisters Museum includes the reconstructed cloister and gardens from the Benedictine Monastery of Saint-Michel-de-Cuxa, 1130-1140 (above). The Cloisters' best-known work is the mysterious “Unicorn in Captivity,” a tapestry woven in the Netherlands around 1500 (right).

The Metropolitan Museum of Art, New York

A modern Romanesque tower stands guard over the gardens of the medieval Benedictine Monastery of Saint-Michel-de-Cuxa at the Cloisters.

European monasteries, this northern branch of the Metropolitan Museum of Art highlights the art and architecture of medieval Europe.

Even the gardens were planted with vegetation documented in poetry, garden books, and art of the same era.

The Cloisters is more than architecture, however. The Merode Altarpiece, a triptych portraying the Annunciation, has been called “one of the most celebrated early Netherlandish paintings—particularly for its detailed observation, rich imagery, and superb condition.”

But perhaps the most famous work is the “Unicorn in Captivity,” one of a series of seven tapestries woven about 1500. It may represent “the beloved tamed,” according to the museum catalog, and the images of plants and flowers are so true to life that their species can be identified.

#### Imbibe at Historic Tavern

From high- to low-brow and a taste of an older, bluer-collar New York, find time to drop by McSorley’s Old Ale House in Greenwich Village, near New York Uni-

versity. Its slogan—“We were here before you were born”—is guaranteed to be true, since the establishment opened for business in 1854. McSorley’s came to fame through the works of two artists: John Sloan’s paintings from the early 1900s and Joseph Mitchell’s classic *New Yorker* story in 1940.

“At midday McSorley’s is crowded,” Mitchell wrote. “The afternoon is quiet. At 6, it fills up with men who work in the neighborhood. Most nights there are a few curiosity-seekers in the place. If they behave themselves and don’t ask too many questions, they are tolerated.”

One other thing: don’t ask for the beer list at McSorley’s. Only the house brand is served, in light and dark varieties.

The bar is still there and so is the potbellied stove that kept the place warm in winter in Mitchell’s day. Turkey wishbones are hooked over the chandelier, mementoes of departing World War I doughboys, according to legend. The city health department forced the management to dust them off a couple of years ago so as not to contaminate the patrons’ ale.

Another tradition ended in 1970 when the Supreme Court pried open the door that kept women out.

Food—burgers, chili, and a few other items chalked up on the board—are available and pretty good, according to a recent review in the *New York Times*, which noted: “[A]s ancient, poetic, dust-caked, gimcrack-packed, sawdust-carpeted shrines go, McSorley’s is arguably the best in America.” **PN**

## Feast on ‘Seinfeld’ Sites Until You’ve Had Your Fill of ‘Nothing’

**What could be wrong with a television sitcom about nothing, especially when it’s about New Yorkers?**

BY AARON LEVIN

**I**hink television plus New York and a dozen cop shows come to mind, but for a certain slice of self-absorbed, middle-class, Big Apple neuroticism, nothing beats “Seinfeld.”

Which is odd, since the show was filmed in California, aside from the occasional exterior shots.

But it can be fun tracking down some of those exteriors or the many references to New York City that crop up in the show.

For a start, Tom’s Restaurant (called “Monk’s” in the show) was where Jerry Seinfeld and friends seemed to dine in most episodes. The real Tom’s is situated at 2880 Broadway and is a major hang-out for students from Columbia University, a few blocks north.

“Tom’s has been a staple in Morning-side Heights, taking care of the locals as well as Columbia students,” says the restaurant’s website, which also claims “the best milkshake in New York!”

Tom’s is open from 6 a.m. to 1:30 a.m. from Sunday through Wednesday and 24 hours on Thursday, Friday, and Saturday.

Another classic dining experience on the show was the “Soup Nazi.” This story thread was based on a real hole-in-the-wall soup stand called Soup Kitchen International and run by the no-nonsense Al Yeganeh. Yeganeh hated the label applied in the show, but was smart enough to parlay the resultant notoriety into a franchised chain and grocery operation. He’s also opened a new stand at

259A West 59th Street near 8th Avenue, where patrons who follow the rules (“Pick the soup you want! Have your money ready! Move to the EXTREME left after ordering!”) are allowed to be served.

One “Seinfeld” episode in season 3 focused on New York’s subway system, often mystifyingly complex for out-of-town visitors. Some lines are demarcated by numbers,

Original Soup Man

A serious man makes a serious soup. Follow the posted rules and Al Yeganeh might sell you some soup at 259A West 59th Street.

Tom’s Restaurant at 2880 Broadway was used for the exterior shots of the restaurant where the “Seinfeld” gang hung out.

Cathy Brown

some by letters; there are express trains and locals. In that episode, Kramer rattles off a bewildering alphanumeric blitz of alternative routes from Manhattan to Coney Island, Elaine rants at delays en route, and Jerry talks with a portly, naked man in a rumbling subway car about the Mets’ chances that year.

The subway episode is one of many

examples of how the show elaborated the ordinary minutiae of everyday life to the point of comic weirdness. Ultimately, who would have imagined that a show that was explicitly about four people doing “nothing” would run for nine years, plus many more in reruns?

Not that there’s anything wrong with that. **PN**

**A** further rundown of the show’s New Yorkiness is posted at <http://www.nycgo.com/articles/15-new-yorkiest-episodes-of-seinfeld>. More about Tom’s Restaurant is posted at <http://www.tomsrestaurant.net/home>. Lots more about The Original Soup Man is at <http://originalsoupman.com>. ## Session to Present High-Impact Psychopharmacology Studies

The four papers published in the *American Journal of Psychiatry* that are the symposium's focus describe new research that could significantly improve aspects of clinical practice.

BY MARK MORAN

Four published studies from the *American Journal of Psychiatry* (AJP) that will have a significant impact on clinical practice will be presented at the symposium "Psychopharmacological Treatment of Depression and Anxiety" at this year's annual meeting in New York.

The symposium will take place Monday, May 5, in Room 1E13 on Level 1 of the Javits Convention Center from 9 a.m. to noon.

AJP Editor-in-Chief Robert Freedman, M.D., who will chair the symposium, said the event has become a regular feature of the annual meeting designed to showcase research published in the journal that has a high impact on real-world psychiatric clinical practice. "We try to publish papers in AJP that inform our readers about issues for which new research data are likely to improve an aspect of their practice," Freedman told *Psychiatric News*. "The goal of the symposium is to allow members to hear directly from the authors of four published papers that have had that kind of impact."

This year's papers are focused on psychopharmacology.

The four papers are "Antidepressant Efficacy of Ketamine in Treatment-Resistant Major Depression: A Two-Site Randomized Controlled Trial" (October 1, 2013); "Evaluation of the FDA Warn-

ing Against Prescribing Citalopram at Doses Exceeding 40 mg" (June 1, 2013); "The International Society for Bipolar Disorders (ISBD) Task Force Report on Antidepressant Use in Bipolar Disorders" (November 1, 2013); and "A Double-Blind Randomized Controlled Trial of Augmentation and Switch Strategies for Refractory Social Anxiety Disorder" (January 1, 2014).

Sanjay Mathew, M.D., of Baylor College of Medicine, will present the paper on antidepressant efficacy of ketamine in depression. The glutamate N-methyl-D-aspartate (NMDA) receptor antagonist ketamine has shown rapid antidepressant effects, but small sample sizes and inadequate control conditions in prior studies have precluded a definitive conclusion. Mathew and colleagues conducted a randomized, controlled trial in which patients with treatment-resistant major depression experiencing a major depressive episode were randomized to receive a single intravenous infusion of ketamine or midazolam in a 2:1 ratio. The ketamine group had greater improvement on the Montgomery-Asberg Depression Rating Scale score

24 hours after treatment compared with the midazolam group, and treatment with ketamine increased the likelihood of response at 24 hours compared with midazolam.

Eduard Vieta, M.D., Ph.D., of the University of Barcelona, will present the paper on the ISBD task force report. The task force integrated the evidence and experience of the task force members and developed a consensus on 12 statements about the use of antidepressants in bipolar disorder. Because of limited data, the task force could not make broad statements endorsing antidepressant use but acknowledged that individual bipolar patients may benefit from antidepressants.

Mark Pollack, M.D., of Rush University Medical Center, will present findings on augmentation treatment of refractory social anxiety. Despite the availability of evidence-based treatments for anxiety disorders, many patients remain symptomatic after initial intervention. Pollack will review results from the first randomized, controlled trial to provide systematic, prospectively derived data on the relative benefits of "next-step"

**New Research Young Investigator 1**

pharmacotherapies to improve outcome for individuals with generalized social anxiety disorder who remain symptomatic after initial treatment.

Kara Zivin, Ph.D., of the University of Michigan and the Serious Mental Illness Treatment Resource and Evaluation Center in Ann Arbor will present new findings on the use of high-dose citalopram for depression. A recent FDA warning cautioned that citalopram dosages greater than 40 mg may cause abnormal heart rhythms including torsades de pointes. Zivin and colleagues conducted a cohort study using Veterans Health Administration data from 2004 to 2009 to assess relationships between citalopram use and ventricular arrhythmias and mortality in depressed patients prescribed citalopram or sertraline. The study found no increased risks of ventricular arrhythmia or mortality associated with citalopram dosages above 40 mg, raising questions regarding the continued merit of the FDA warning.

Freedman told *Psychiatric News* that the FDA ruling regarding high-dose citalopram has been highly controversial. "Many clinicians have found in their

practice that higher doses are sometimes required," he said. "So now there are two different datasets—Dr. Zivin's report and the FDA's—regarding the safety of high-dose citalopram. Dr. Zivin will present both sides of the controversy so that clinicians can decide for themselves when and under what circumstances to use this treatment strategy." **PN**

#### Free Self-Assessment Tool Will Help You Plan Meeting Schedule, Earn Credit

APA has developed an educational activity—the 2014 APA Annual Meeting Self-Assessment in Psychiatry—to help meeting registrants create an individualized schedule of sessions to attend at APA's annual meeting in New York. The self-assessment is a 100-question examination that tests areas of psychiatric practice covered in the ABPN content outline for the recertification exam. Participants can earn up to 8 hours of AMA/PRA Category 1 credit and fulfill up to 8 hours of a self-assessment component of the maintenance of certification process. Meeting registrants will be auto-enrolled and told how to access the self-assessment by e-mail. For more information, send an e-mail to [EDUCME@psych.org](mailto:EDUCME@psych.org).

# Minority, Underrepresented Groups Share Concerns Through Caucuses

**P**sychoiatrists who identify with any of APA's recognized minority and underrepresented (M/UR) groups are urged to join that group's caucus and attend its meeting at APA's 2014 annual meeting in New York in May. The minority and underrepresented group caucuses were established to provide a networking opportunity and foster communication among members who share a special interest.

There are caucuses for the following groups: American Indian/Alaska Native/Native Hawaiians; Asian Americans; blacks; Hispanics; lesbians, gays, and bisexuals; international medical graduates; and women.

Participation in a caucus is a pathway to the following:

- Exploring concerns about professional growth and advancement.

- Identifying, supporting, and electing top-notch M/URs for leadership posts.
- Networking with members with shared backgrounds.
- Advocating for minority patient populations.
- Talking about key issues facing APA.
- Initiating mentoring relationships.
- Bringing concerns to APA leadership.
- Assuming leadership roles in APA. 

 To join a caucus, go to APA's website at [www.psychiatry.org](http://www.psychiatry.org) and click on "Join & Participate" and "My Account"; then log into your account and click on "Member Profile." Go to question 3Fa and select the appropriate caucus or caucuses you wish to join.

## Minority Caucuses to Meet

### SUNDAY, MAY 4

#### Caucus of Hispanic Psychiatrists

2 p.m.-3:30 p.m.

*Liberty 4, Third Floor, Sheraton New York Times Square Hotel*

#### Caucus of Gay, Lesbian, and Bisexual Psychiatrists and Association of Gay and Lesbian Psychiatrists (joint meeting)

2:30 p.m.-4 p.m.

*Conference Room I, Sheraton New York Times Square Hotel*

### MONDAY, MAY 5

#### Caucus of International Medical Graduate Psychiatrists

4 p.m.-5 p.m.

*Madison 1, Fifth Floor, Sheraton New York Times Square Hotel*

#### Caucus of Black Psychiatrists

7 p.m.-8 p.m.

*Conference E, Lower Lobby, Sheraton New York Times Square Hotel*

#### Caucus of Asian-American Psychiatrists

7 p.m.-8 p.m.

*Conference C, Lower Lobby, Sheraton New York Times Square Hotel*

#### Caucus of American Indian, Alaska Native, and Native Hawaiian Psychiatrists

7 p.m.-8:30 p.m.

*Madison 1, Fifth Floor, Sheraton New York Times Square Hotel*

### TUESDAY, MAY 6

#### Caucus of Women Psychiatrists and the Association of Women Psychiatrists (joint meeting)

5:30 p.m.-7:30 p.m.

*Riverside Ballroom, Third Floor, Sheraton New York Times Square Hotel*

## Psychopharmacology Master Course to Offer MOC Credit

Get an extra mile out of this continuing education course.

For the first time, APA is offering an opportunity to earn CME credit toward meeting maintenance of certification (MOC) requirements through an innovative and interactive course at this year's annual meeting. Participants in the "Psychopharmacology" master course, directed by Alan Schatzberg, M.D., will be eligible to earn both Self-Assessment/CME (part 2 of MOC) and Performance Assessment Chart Review (part 4 of MOC) credit.

The course will be held Tuesday, May 6, from 9 a.m. to 4 p.m. at the New York Hilton Midtown. It will cover the latest information on the pharmacologic treatment of major psychiatric disorders and include case discussions.

For the self-assessment activity, participants will take a pre-test using an audience response system (ARS). After each question has been projected on a screen and participants have entered their answer into the ARS, the responses will be tallied by percentage and projected along with the correct answer. A study guide with rationales and references will be provided at the conclusion of the course, and participants will be instructed on how to access peer comparisons.

For this live clinical Performance in Practice (PIP) module (chart-review) activity, participants will be asked to review five charts before the course. They should choose one of the following medication classes for the chart review: SSRIs, benzodiazepines, atypical antipsychotics, or anticonvulsants/lithium. APA will send those participating in the clinical PIP activity four quality measures that should be assessed on the five charts for one of the medication classes. They do not need to share this information with the course leaders, APA, or the ABPN, but they should make personal notes about areas where they may be deficient and be prepared to discuss any clinical issues or present cases in the course's breakout sessions.

After the meeting, participants who wish to obtain MOC self-assessment credit must log in to the APA learning management system, evaluate the CME activity, and claim their CME credit for both Stage A and Stage B of the PIP module for one of the medication classes. To finish the clinical PIP module, participants must review five more charts (the same patient or different patients) six months to two years after the course and note improvements, access the evaluation for the Psychopharmacology PIP on the APA learning management system at [www.apaeducation.org](http://www.apaeducation.org), and complete the evaluation, as for any other CME activity.

To register for the course, see the insert at page 13.

## Session to Help Clinicians Navigate Psychiatric Disability Issues

**Skill and understanding of the disability process help minimize patients' downtime from work.**

BY MARY CLAIRE KRAFT

To be able to work has usually been thought of as a sign of overall health. What happens when a patient is unable to do so? How does the psychiatrist navigate the road between impairment, symptom improvement, and work? What happens when there is a disagreement

between patient and physician? Between patient, physician, and employer?

Psychiatric training programs are busy teaching risk assessments, safety plans, and treatment plans. But there is rarely time to learn the skill that will challenge every psychiatrist who sees patients—the work-assessment, impairment, and return-to-work plan. Those attending APA's annual meeting should plan to join Paul Pender, Psy.D., from JPMorgan Chase, and R. Scott Benson, M.D., for a candid dialogue between employer and psychiatrist that will help clinicians better handle the sometimes competing demands of the parties involved in the disability process.

The session, titled "Doctor I Can't Take My Job, Sign Me Off Work: Strate-

gies to Navigate Disability Assessment and Management While Providing Psychiatric Treatment," will be held Monday, May 5, at 3:30 p.m. at the Javits Convention Center.

Discussion will include a review of the methods used to assess and document work-related impairment and the crucial distinction between "impairment" and "disability." Case examples will demonstrate how diagnostic decisional trees do not necessarily lead to an off-work recommendation and how that often unwelcome recommendation can be communicated to patients. Karasek's "job strain model" will be explored to help attendees understand why there may be an increase in requests for time off work by employees citing psychiatric conditions.

The workshop is being presented in conjunction with the Partnership for Workplace Mental Health, a program of the American Psychiatric Foundation. **PN**

##### Ethical Issues Surrounding Neurostimulation in Older Adults

tin, M.D., serving as discussant. It will take place Tuesday, May 6, from 9 a.m. to noon in Room 1A21 of the Javits Convention Center.

Beyond EHRs, the application of HIT to improve quality of care and expand the scope of psychiatric services has recently included the use of videoconferencing, or telepsychiatry, to facilitate mental health assessment and treatment. The ability to narrow the provider-patient gap and help extend the reach of psychiatrists in the field—vitally important given the critical workforce shortage facing psychiatry today—are among telepsychiatry's noted benefits. But how can telemedicine be effectively integrated into clinical practice, and what are the most pressing needs facing psychiatrists who want to take advantage of this unique opportunity?

To address these and related questions, the Committee on Mental Health Information Technology will sponsor the workshop "Telepsychiatry—Updates and Opportunities for Psychiatrists and ACOs," which will discuss key concepts in telepsychiatry and its potential use for both routine clinical practice settings as well as larger patient care organizations.

The workshop will be chaired by Daniel Balog, M.D., and will be held Sunday, May 4, from 8 a.m. to 9:30 a.m. in Room 1A19/1A20 of the Javits Convention Center. **PN**

## Facing the Future: HIT and Changes to Psychiatric Care

These sessions will help psychiatrists understand key issues in health information technology, such as privacy concerns, as well as learn more about telepsychiatry in small and large clinical settings.

BY EMILY KUHL, PH.D.

With rising interest in the use of electronic health records (EHR) and telepsychiatry, it is imperative that psychiatrists are aware of the latest issues concerning health information technology (HIT). To facilitate this, APA's Committee on Mental Health Information Technology is sponsoring two sessions at the 2014 APA annual meeting to address recent topics concerning the growing use of HIT, as well as issues clinicians will likely face over the coming year.

Under the Health Information Technology for Economic and Clinical Health (HITECH) Act, the U.S. Department of Health and Human Services is authorized to spend nearly \$30 billion to support the promotion and use of HIT. A subgroup of the National Health Information Technology Committee was formed to ensure requirements of the HITECH Act are executed and to address challenges related to privacy concerns, such as transmission of pro-

tected health information and encryption limitations of EHRs. These complex, rapidly evolving issues are vital to psychiatrists' understanding of the cur-

rent limitations of HIT and how privacy issues might impact patient care.

The symposium "Electronic Health Record Privacy Update 2014" will teach audiences about the latest and most relevant aspects of the national EHR policy, as well as pragmatic issues related to HIT privacy. Speakers also will discuss how health information exchanges and open-source software play a role in privacy concerns. The session will be chaired by Zebulon Taintor, M.D., and Robert Kolodner, M.D., with Glenn Mar-

Emily Kuhl, Ph.D., is the senior science writer in APA's Division of Research.

## Rachmaninoff on the Bill For Psychiatrist-Pianist

**Psychiatrist and concert pianist Richard Kogan, M.D., plans to give another lecture and mini-concert about a famous composer at the annual meeting. And this time it will include a psychiatrist and a happy ending.**

BY JOAN AREHART-TREICHEL

**P**sychiatrist-concert pianist Richard Kogan, M.D., will once again present one of his highly popular lecture/mini-concerts at the APA's 2014 annual meeting in May.

Kogan's specialty is giving an overview of the lives of great classical composers and how their psychiatric or psychological issues affected their creativity, then playing some music by the composers to illustrate his points. In this year's program, he will focus on the Russian composer Sergei Rachmaninoff.

Actually, this is a story not just of Rachmaninoff, but of a psychiatrist named Nicolai Dahl, Kogan said during a recent interview. At a critical juncture in his career, when he was in his early 20s, Rachmaninoff fell into a severe depression; he had a commission to write a piano concerto, but was unable to write anything. He found his way to the office

of Dahl, who had studied hypnosis with Charcot in France. Through a combination of hypnosis and psychotherapy, Dahl explored Rachmaninoff's conflicts and challenges. At the end of four months, Rachmaninoff's depressive symptoms subsided and so did his writer's block.

"This is a wonderful illustration of how valuable psychiatrists can be to individuals who are in the throes of creative block," said Kogan. "And the upshot is this: Rachmaninoff has gone down as one of the great all-around musicians of the 20th century—outstanding as a composer, pianist, and conductor. Were it not for the timely intervention of Dr. Nicolai Dahl, he probably would have gone down as a little-known footnote in music history."

"I am very excited about sharing this program with my psychiatric colleagues at the APA annual meeting, which will be in my hometown of New York City," Kogan declared. "By the way, in 1917, after the Russian Revolution, Rachmaninoff fled his homeland of Russia. He settled in New York City and lived on West End Avenue. So that is another New York tie-in for the APA program."

Aside from being a concert pianist,

Richard Kogan, M.D.: "Without the timely intervention of Dr. Nicolai Dahl, Rachmaninoff probably would have gone down as a little-known footnote in music history."

Kogan is a clinical professor of psychiatry at Weill Cornell Medical College and artistic director of the Weill Cornell Medical College Music and Medicine Program. **PM**

**▶** Kogan's session will be held on Monday, May 5, from 12:30 p.m. to 2 p.m., in the Marriott Marquis Hotel, Astor Ballroom, seventh floor. At a previous annual meeting, Kogan discussed Beethoven. To see a video of part of the presentation, go to [www.youtube.com/watch?v=PDNhzcNJqQ](http://www.youtube.com/watch?v=PDNhzcNJqQ).

## Show Your Colleagues Your Creative Side

A poem called "Tomorrow," a stained glass window called "The Kiss," and a photo of tango dancers were three of the works of art that earned top prizes at past APA Art Association exhibits.

BY JOAN AREHART-TREICHEL

Freud had a son, Ernst, who was an architect, and a grandson, Lucian, who was a well-known painter. His great-granddaughter, Jane McAdam Freud, is an acclaimed sculptor working in London. Thus, artistic talent may have coursed through Freud's blood, even though his main interests were cerebral.

And the same may hold for many psychiatrists: even though their major interests are intellectual, they harbor creative urges that they express via a wide range of media.

Are you one of these psychiatrists? Do you write poetry, paint, take photographs, or engage in some other form

This painting won "Best in Show" at the APA Art Association exhibit in 2011. It is titled "Travel Through Humanity: A Moroccan Man" and was painted by Karen Redding.

of creative activity? If so, you might want to display some of your work at the APA Art Association's exhibit at this year's annual meeting.

The work can be in the following categories: black and white or color photography, ceramics, computer art, crafts, fiber, graphics, jewelry, painting (mixed, oil, or water-based), poetry, and sculpture. Artists can submit up to six works.

To exhibit, you must be an APA member, a spouse or partner of an APA member, a member of the Canadian Psychiatric Association, or a full-time staff member of APA.

The APA Art Association, which includes at least 70 members, was founded by a Florida psychiatrist, the late Norman Schulack, M.D., in 1969. "He did gorgeous goldsmith work," Paul Wick, M.D., president of the association in

2012, told *Psychiatric News*. The number of people exhibiting each year has been between 15 and 50, Wick reported, with the number of visitors running into the thousands.

Visitors to the exhibit can vote for their favorite work. Some of the winners over the years have been a stained glass window called "The Kiss," by Gail Barton, M.D.; a poem, "Tomorrow," by Ferruccio DiCori; a watercolor, "Haunted House," by Aydogan Ugar, M.D.; a sculpture, "In Perfect Balance," by T.A. Flanagan, M.D.; and a photo, "The Tango," by Robert Trivus, M.D.

"The cardinal objective of the show is to get our fellow psychiatrists to discover their talents and express it," Habib Nathan, M.D., the current president of the APA Art Association and a past APA Art Association exhibit awardee, said. "Furthermore, the feedback that we receive is most rewarding." **PN**

**➔** To learn more about how to enter artwork in the exhibit, go to [www.psych.org](http://www.psych.org), then click on "Annual Meeting," and then on "Information Guide." Information about the exhibit is posted on pages 4 and 56. You can also contact Nathan at (210) 836-8575 or [nathanhabib@yahoo.com](mailto:nathanhabib@yahoo.com).

**Apply for APA Fellowship**

Are you ready to take the next step in your professional career? Being a fellow or an international fellow of APA is an honorary designation recognizing members who have demonstrated allegiance to their profession and commitment to the ongoing work of APA. Members who pursue fellow status perceive it as one of the first steps to enhancement of their professional credentials.

Members who apply and are approved this year for fellow status will be invited to participate in the Convocation of Fellows and Distinguished Fellows at APA's 2015 annual meeting in Toronto.

Stop by the APA Membership Booth in the Member Center at the Javits Convention Center to pick up an application. To obtain more information and apply now, U.S. and Canadian members should visit <http://www.psychiatry.org/join-participate/member-benefits/becoming-a-fellow>; international members should visit <http://www.psychiatry.org/join-participate/international-psychiatrists>.

lational Research and Treatment Development.

Chung said that symposia participants will walk away with important insights about research advances that will be useful in their careers.

"On Monday, symposium attendees will see how some psychiatric disorders, such as schizophrenia, could be developmental brain disorders, . . . so the earlier we identify the underlying factors, the more likely we will be to achieve positive long-term outcomes. At Tuesday's symposium, participants will become aware of new psychotherapies and technologies that they may use in their own practice in the future. As it relates to RDoC, many people are unaware what the criteria entail, but at the end of the symposium [on Wednesday] people will know about research that uses RDoC as a framework for understanding mental illness."

Chung emphasized that NIMH hopes that this year's annual meeting attendees will be able to dedicate three hours of their time to at least one session sponsored by the institute to learn about the the top priorities at NIMH. **PN**
